# INTRODUCTION

This guide demonstrates how to remove and replace fuses for your Dodge truck.
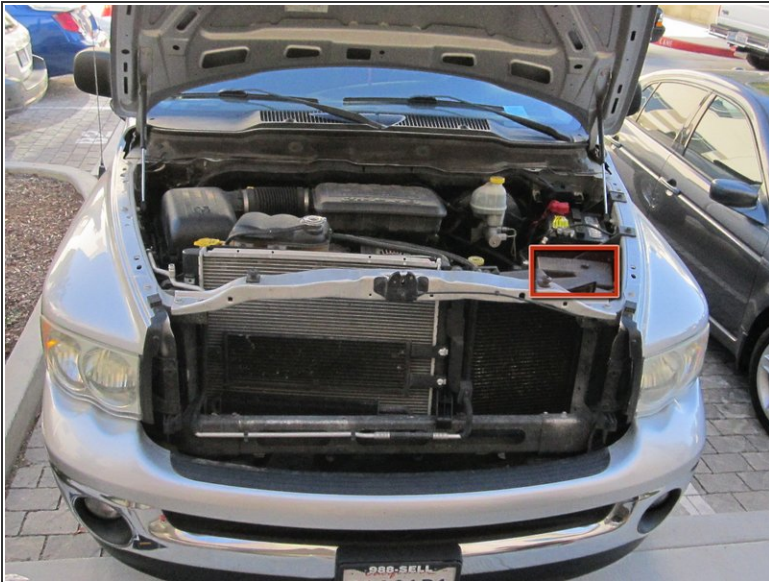

## 🔧 TOOLS:

- Fuse Box Tool (1)

## ⚙ PARTS:

- Automotive fuse (1)

## Step 1 — 2002-2008 Dodge Ram 1500 Fuse Replacement

- Open the hood by pulling the hood lever in the driver-side footwell.

- Reach under the center of the grille and press the hood latch.
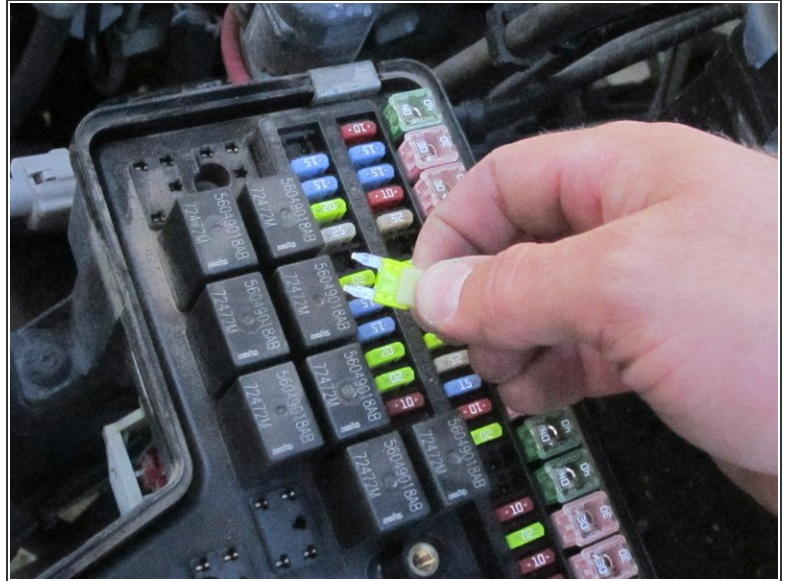

## Step 2

- Locate the fusebox. The fusebox is the box that says "Fuse and Relay Center", near the left front fender of your Dodge.

- Unscrew the plastic nut that holds the cover of the fusebox in place.

This document was generated on 2020-11-19 02:12:26 PM (MST).

## Step 3

- Remove the nut and the cover of the fusebox. Use the inside of the fusebox cover to determine which fuses you need to check.

- Locate the fuse grabber. The fuse grabber is located near the front of the fusebox.

- Remove the fuse grabber from its holder.

## Step 4

- Use the fuse grabber to carefully pinch the fuse.

- Pull the desired fuse out.

⚠ Be sure to replace each blown fuse with a fuse of the correct current rating and size. Serious damage can occur if the wrong fuse is used.

To replace a fuse, follow these instructions in reverse order. Make sure you buy the correct fuse to replace a blown fuse. Serious damage can occur if you do not use the correct replacement fuses.
