

Motorola i450 Boost Mobile Antenna Replacement

This guide provides instructions for removal and replacement of the antenna.

Written By: Garrison Stevens

INTRODUCTION

The antenna greatly affects the quality of the phone's reception.

TOOLS:

- [Anti-Static Project Tray](#) (1)
 - [Spudger](#) (1)
 - [T5 Torx Screwdriver](#) (1)
-

Step 1 — Antenna

- Place the phone on a flat surface with the front facing down and the antenna fully extended.
- Use a spudger to remove the circular rubber cover from the base of the antenna.
- Remove the 3.2 mm Torx T5 screw located under the rubber cover.

Step 2

- Remove the antenna by grasping from the white plastic piece just below the antenna and pulling away from the phone.

 Do not grasp the black antenna piece to pull it out. Doing so may damage it.

To reassemble your device, follow these instructions in reverse order.
