## INTRODUCTION

If your Hover-1 Titan battery will no longer hold a charge or your device will not turn on, use this guide to remove and replace your battery.

### TOOLS:

- [Phillips #1 Screwdriver](#) (1)
-

## Step 1 — Bottom Right Panel

- Flip the hoverboard so the bottom is facing up.
- ⓘ The right side is the side that has the power button. There is also an "R" on the metal plate underneath the battery.

## Step 2

- Using a Phillips #1 screwdriver, remove the two 14 mm screws closest to the center of the hoverboard.
- Using a Phillips #1 screwdriver, remove the four 12 mm screws located in the middle of the panel.
- Using a Phillips #1 screwdriver, remove the two 15 mm screws located closest to the wheel.

## Step 3

- Grip the bottom right panel and lift to remove it.

## Step 4 — Battery

- Unplug the battery from the gyroscope/motherboard by holding the yellow connector and pulling apart.

## Step 5

- Remove the bundle of wires from the clip on the top of the battery.

## Step 6

- Using a Phillips #1 screwdriver, remove the four 14 mm screws that hold the battery on the device.

## Step 7

- Remove the battery out of the hoverboard by lifting the battery then sliding it out from under the wires.

To reassemble your device, follow these instructions in reverse order.
