

CygoLite Night Rover Top Casing Replacement

This guide provides instructions on how to replace the top casing of the CygoLite Night Rover.

Written By: Ryan

INTRODUCTION

This guide will show how to install the top casing on the CygoLite night rover. It will start from the torn-down position and show the proper installation of the top casing.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)

PARTS:

- [New CygoLite Night Rover top casing](#) (1)

Step 1 — Top Casing

- Start with the device torn down to just the base, with the internals of the device showing.
- Place the top casing onto base.
- Ensure that the rubber gasket is positioned properly between the top and bottom casings
- Flip the device with the bottom facing upwards.
- Reinsert and screw in the screws to the bottom casing.

To reassemble your device, follow these instructions in reverse order.
