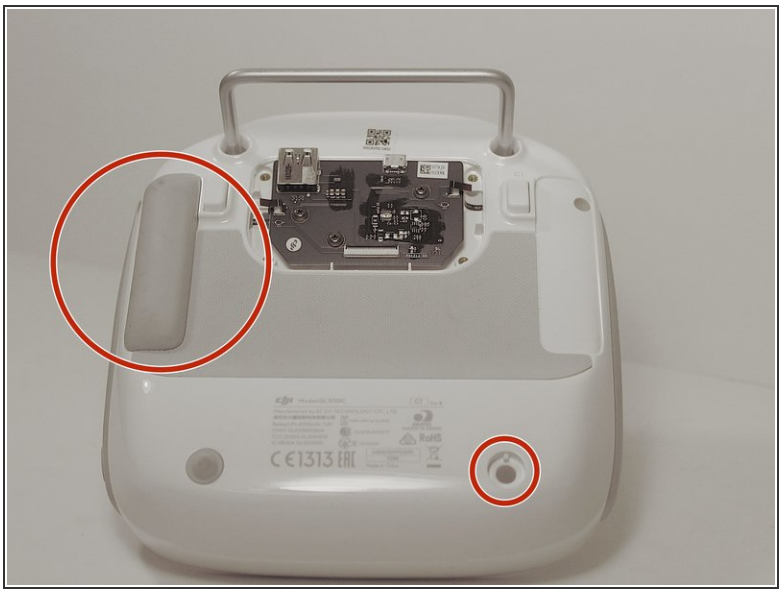
Step 4



- Peel off the rubber grips to access the screw holes.

⚠ Make sure to save your grips and do not to get them stuck to anything, you are going to want to save the adhesive.

- Remove the back board and set it aside.

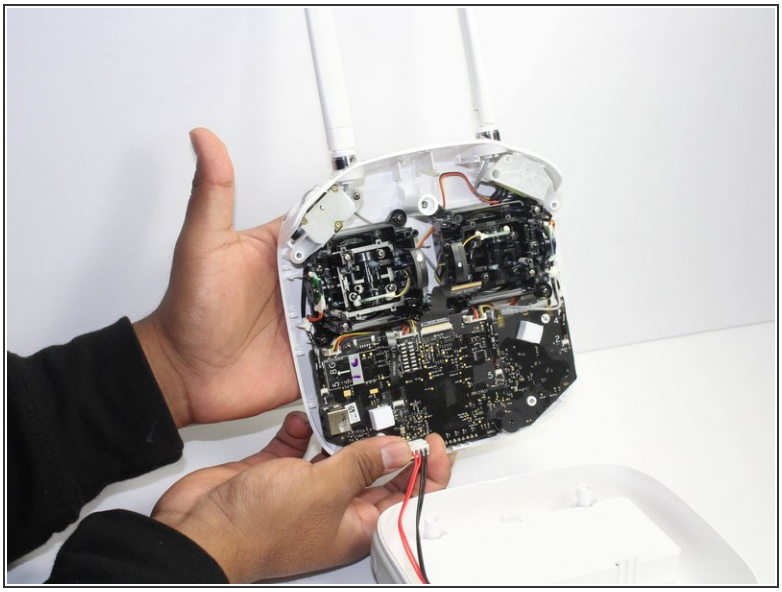
Step 5



- Pull apart the back plastic panel.

Recommended tool for this would be the metal spudger, but not required.

- Once the back panel is off, you will have access to the motherboard.

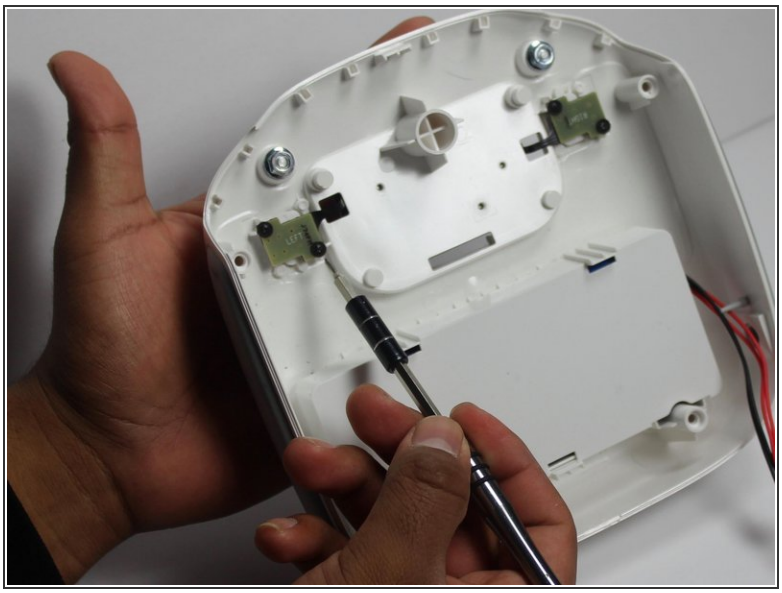
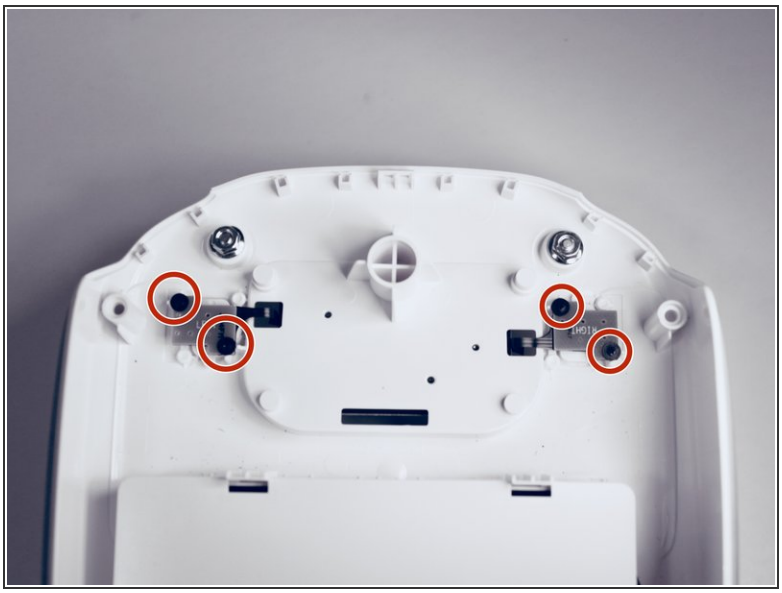
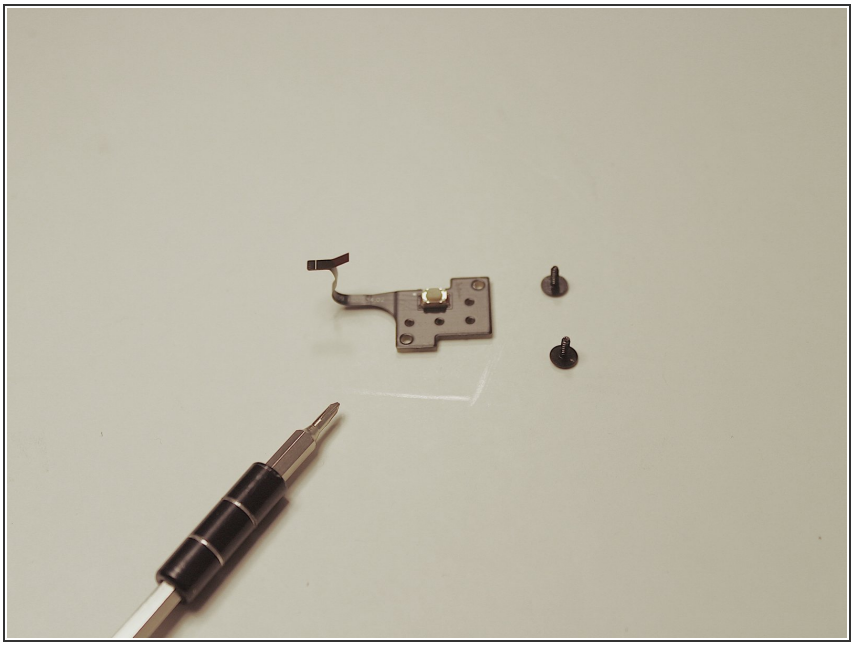
Step 6 — Back Buttons





- Using a Phillips #00 screwdriver, remove the four screws on the inside of the panel. That will allow you to remove the buttons by gently lifting them with your hands.

Step 7



- Remove back buttons and replace with new ones.

To reassemble your device, follow these instructions in reverse order.
