Step 4

- Peel off the rubber grips to access the screw holes.

⚠ Make sure to save your grips and do not to get them stuck to anything, you are going to want to save the adhesive.

- Remove the back board and set it aside.

Step 5
- Pull apart the back plastic panel.

- (i) Recommended tool for this would be the metal spudger, but not required.

- Once the back panel is off, you will have access to the motherboard.

To reassemble your device, follow these instructions in reverse order.
