INTRODUCTION

How to replace the optical drive of an HP ProBook 440 G1.

🔧 TOOLS:

- Phillips #0 Screwdriver (1)

Step 1 — Battery

⚠ Make sure the laptop is turned off before you start.

● Push and hold the release tab on the right and left toward the center.

Step 2

● Pull the battery out.

Step 3 — Backplate

- Push and hold the release tabs on the right and left toward the center again.
Step 4

- Slide the backplate off.
Step 5 — Optical Drive

- Locate the optical drive, near the battery on the right side.

Step 6

- Remove the Philips PM2.5x6.0 screw that attaches the optical drive to the computer.

Step 7

- Slowly remove the optical drive, by pulling it straight out of the slot.

To reassemble your device, follow these instructions in reverse order.
