[Spudger](#) (1)

## PARTS:

[04X3927 - Lenovo Laptop LCD Screen - Genuine](#) (1)

## Step 1 — Screen Display

- Open the device so that it is laying flat
- ⓘ Turn off device before starting

## Step 2

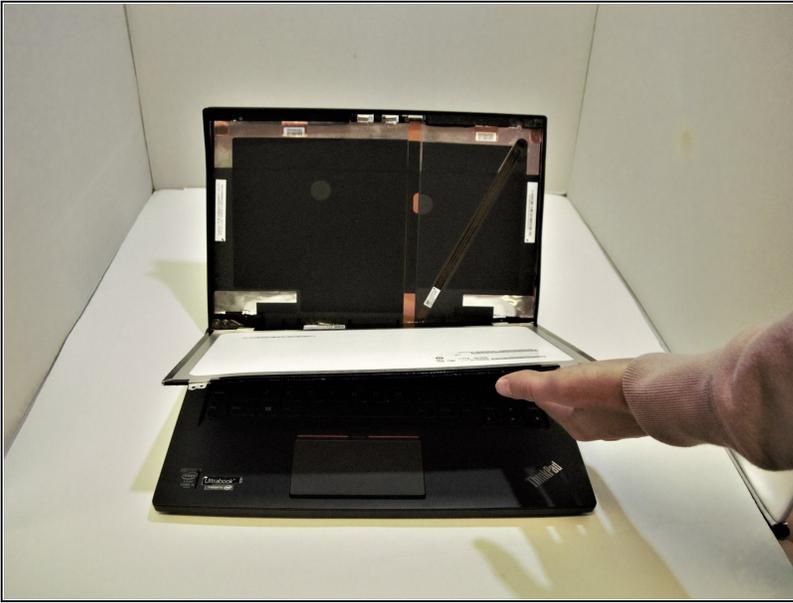

- Pry the bottom right corner of the screen's border and gently peel off the adhesive screen cover
  - ① You will find a sticky adhesive under the screen border. Be gentle when pulling it off and take your time to insure that you do not damage it.

## Step 3

- Unscrew the screws from each corner of the screen

## Step 4

- Slowly lean the computer forward so that the screen gently falls into your hand

## Step 5

- Unplug the cord that connects the screen to the rest of the computer
  - ⚠ Carefully use a metal prying tool to disconnect the two metal prong ends underneath the tape.

To reassemble your device, follow these instructions in reverse order.
