

LG Fortune Rear Camera Replacement

This guide will help your camera to stay in focus, and work quicker by replacing the camera.

Written By: Cori Johnson

INTRODUCTION

If your LG Fortune's camera has begun degrade a little bit and is not taking pictures as well as it should, or has, then use this guide to replace your camera

TOOLS:

- Phillips PH000 Screwdriver (1)
- Spudger (1)
- Metal Spudger (1)

Step 1 — Battery

- Use the slit on the bottom right side of the phone to open the back cover of your phone.
 - (i) It will be the bottom left of the phone if looking at it from the back.
- Slowly pry the back cover off the phone starting from the bottom up to the top.

Step 2

Use the slot in the middle of the bottom edge of the battery to pry it up and out of the case.

Step 3 — Motherboard

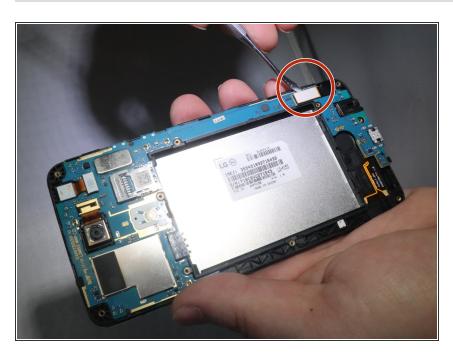

- Using a PH000 screwdriver, remove the ten 4mm screws on the back panelling.
- Remove the back panelling from the device with your fingers or a spudger.
- Work slowly side to side to release this back casing and expose the motherboard.

Step 4

- Unplug the video card from the motherboard with a spudger or plastic opening tool.
 - ↑ Using the metal spudger as shown in the photos has the potential to damage your device.

Step 5

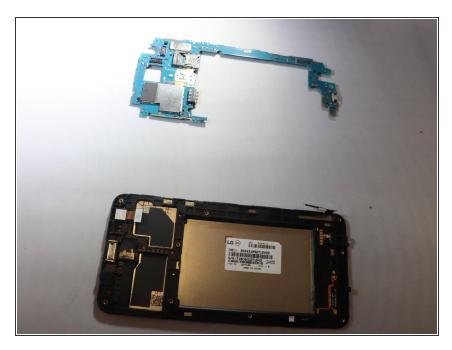

- Unplug the front facing camera press fit connector from the motherboard by prying upwards with a spudger or plastic opening tool.
 - Using a metal spudger as shown in the photos could potentially damage your device.

Step 6

- Unplug the rear facing camera ribbon cable from the motherboard by prying up the press fit connector with a spudger.
 - ↑ Using a metal spudger as shown in the photos has the potential to damage your device. Choose an ESD safe tool instead.

Step 7

 Use the spudger to pry off the motherboard from the rest of the device on the top left corner down to the bottom right corner

Step 8 — Rear Camera

- Unplug the camera from the phone using a metal spudger to get underneath the tape and remove the camera.
- (i) This will require a bit of force. Don't be afraid to apply the necessary amount to remove.

To reassemble your device, follow these instructions in reverse order.
