Casio MTD-120 Battery Replacement

If your Casio watch (MTD-120) has been losing...

Written By: Isabel Chavez

INTRODUCTION

If your Casio watch (MTD-120) has been losing time, showing incorrect time or stopping, it most likely has a dead or dysfunctional battery, which requires replacement.

A functional battery provides power to the watch such that the hands of the watch start functioning properly to show correct time.

🔧 **TOOLS:**	⚙️ **PARTS:**
Tweezers (1)	Battery - SR920SW (Module-5339) (1)

Step 1 — Battery

- Place the watch upside down.

Step 2

- Remove the back cover of the watch with tweezers.

ⓘ This should reveal a plastic cover once the back is removed.

Step 3

- Remove the plastic cover with the tweezers.

ⓘ You should now see the battery compartment.

Step 4

- ● Remove the battery with the tweezers.

- ⓘ Use your fingers to remove the battery if you find it difficult using the tweezers.

Step 5

- ● Insert the new battery by pushing down gently.

- ⓘ The battery needed for this watch is an SR920SW.

- ● Recycle the old battery.

- ⓘ Where To Recycle Batteries

Step 6

- Place the plastic cover back over battery compartment.

- Align the marked area of the plastic cover with the crown of the watch.

- ⓘ The crown is the knob that is used to set the watch.

Step 7

- Put the cover back and tighten it shut by pressing on it.

Follow the link provided in step 5 to find more information on recycling your old batteries.
