

# HomePod Bottom Foot Replacement

Replacing the silicone bottom foot is easy and requires a hair dryer or heat gun.

Written By: Nicholas Ouimet

## TOOLS:

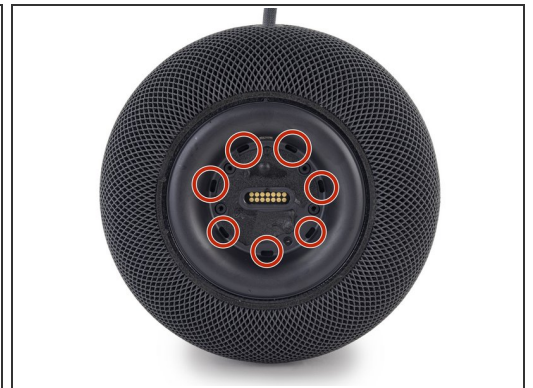

- [Hair Dryer](#) (1)
-

## Step 1 — Soften the Adhesive

- Using a hair dryer on hot or a heat gun on low, carefully heat up the bottom foot for 1-2 minutes.

## Step 2 — Remove the Foot

- Using your fingernails or a guitar pick, separate the outer portion of the foot from the mesh and remove from the HomePod
- *Be careful not to break the small tabs that position the foot to the bottom of the HomePod*

To reassemble your device, follow these instructions in reverse order.
