## Step 1 — Open The Compartment

- For a more effortless experience, use an opening tool to remove the back. Simply push the opening tool into the indent in the bottom and work your way around a little so you can pop it off.

## Step 2 — Remove, Replace

- Remove the battery by pulling it out, replacing it with a new one, and putting the cover back on.

## Step 3 — Complete!

- That's it! Thanks for following this simple guide! Bye!

To reassemble your device, follow these instructions in reverse order.
