

# Kensington Expert Trackball Mouse Teardown

Written By: teardown-er

## Step 1 — The Mouse

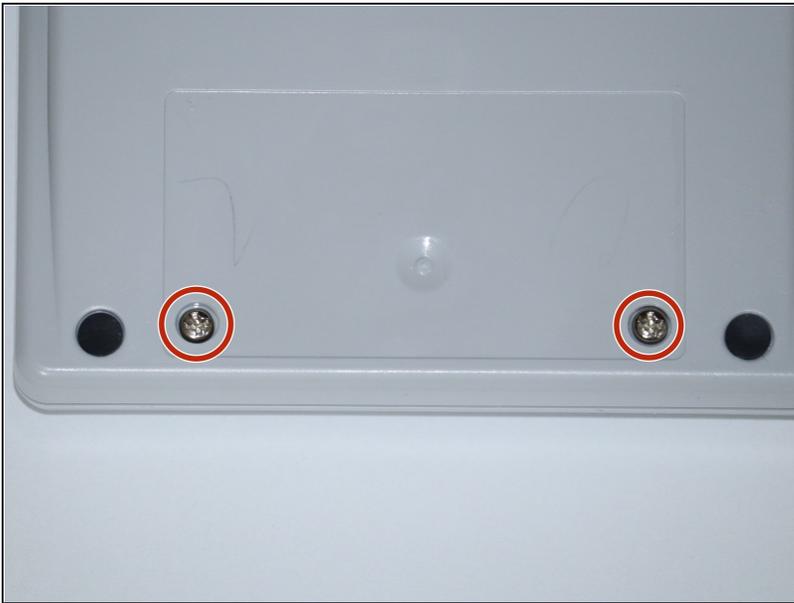

- This is the Kensington Expert Trackball Mouse. This ergonomic mouse, from the 1990s, features a roller ball, and 4 tactile buttons. Begin by removing the roller ball by flipping the mouse upside down.

## Step 2 — Remove the Sticker

- Begin by peeling the sticker from the back of the mouse.

### Step 3 — Unscrew the Back Plate

- Remove the phillips screws.

### Step 4 — Pull it Apart!

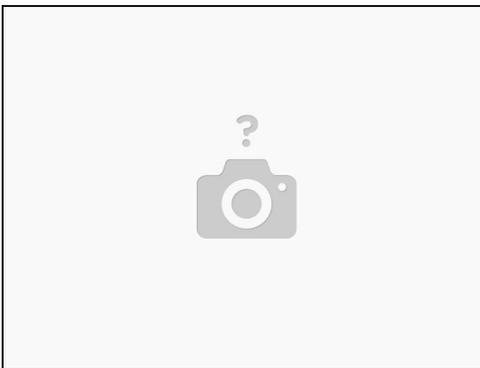

- Separate the top and bottom halves of the mouse.

## Step 5 — A Closer Look at the Circuit Board

- The simple circuit board features many modular components, making repairs easy.

## Step 6 — Congratulations!

- You took your Kensington Expert Trackball Mouse apart!
- 

To reassemble your device, follow these instructions in reverse order.
