Step 1 — RAM

- Using a Phillips screwdriver, remove eighteen 1.2mm Phillips #1 screws on the back.

Step 2

- Remove the back plane.

- Locate the memory slot.

Step 3

- Open the retaining latches on either side of the RAM card with your fingers or plastic tool.

- (i) When both anchor pins are open, the RAM pops up.

- Remove the RAM.

Step 4

- Align the notched part of the RAM with the raised part of the card slot.

- Push inward until the notch and bulge coincide.

- Press the other end of RAM down with your finger.
  - (i) When you hear a clicking sound indicating that the retaining clips are reengaged, you are done installing.

Step 5

- Assemble the back plate.
