

String Cheese Teardown

String cheese teardown.

Written By: BeanMan56

INTRODUCTION

Teardown of string cheese

TOOLS:

- [Heavy-Duty Spudger](#) (1)
- [Tweezers](#) (1)
- [iOpener](#) (1)

Step 1 — Remove the plastic packaging

⚠ Be cautious when using the iOpener for opening the adhesive on the cheese packaging.

- Inspect the string cheese packaging. You should see a perforated corner that you can stick the tip of your spudger into.
- Once you put the tip of the spudger into the plastic pull the corner with your other hand, guiding the spudger along as you peel back the packaging.

Step 2 — We're in!

- We're in to the GOOD stuff,
- Pull up on the cheese to get it unstuck from the adhesive

Step 3

- Then peel the last bits of adhesive away

⚠ YOU CANT PUT IT BACK *TOGETHER*
