**TOOLS:**

- Phillips #2 Screwdriver (1)
- Phillips #000 Screwdriver (1)

**PARTS:**

- Metal Spudger (1)

Step 1 — Stand

- Place the monitor face down on a clean, flat surface.

Step 2

- Firmly remove the back panel of the stand by pulling it up and away from the monitor.

Step 3

- Unscrew the two 6mm Phillips PH2 screws to detach the stand enclosure from the stand.

Step 4

- Firmly grasp the stand enclosure with your hand and slide it to base of stand.

Step 5

- Unscrew the two 14.5mm Phillips PH2 screws holding the stand to the monitor.

Step 6

- Lift the the stand straight up to remove it.

Step 7 — Monitor Enclosure

- Place the monitor screen face up.
- Pull the frame off by placing your fingers on the inside of the frame and pulling out and up, the frame should snap off.
- Continue your way around the screen.

Step 8

- Unscrew the two 7mm screws from the bottom of the button assembly.

⚠ Do not pull the button assembly out too quickly or with too much force! Damage to the wires can occur.

- Pull the button assembly out a few inches and unplug the colored cables.

Step 9

- Unscrew the gold colored 7mm Phillips PH000 screw holding the button assembly to the monitor.
- Remove the button assembly from the monitor.

Step 10

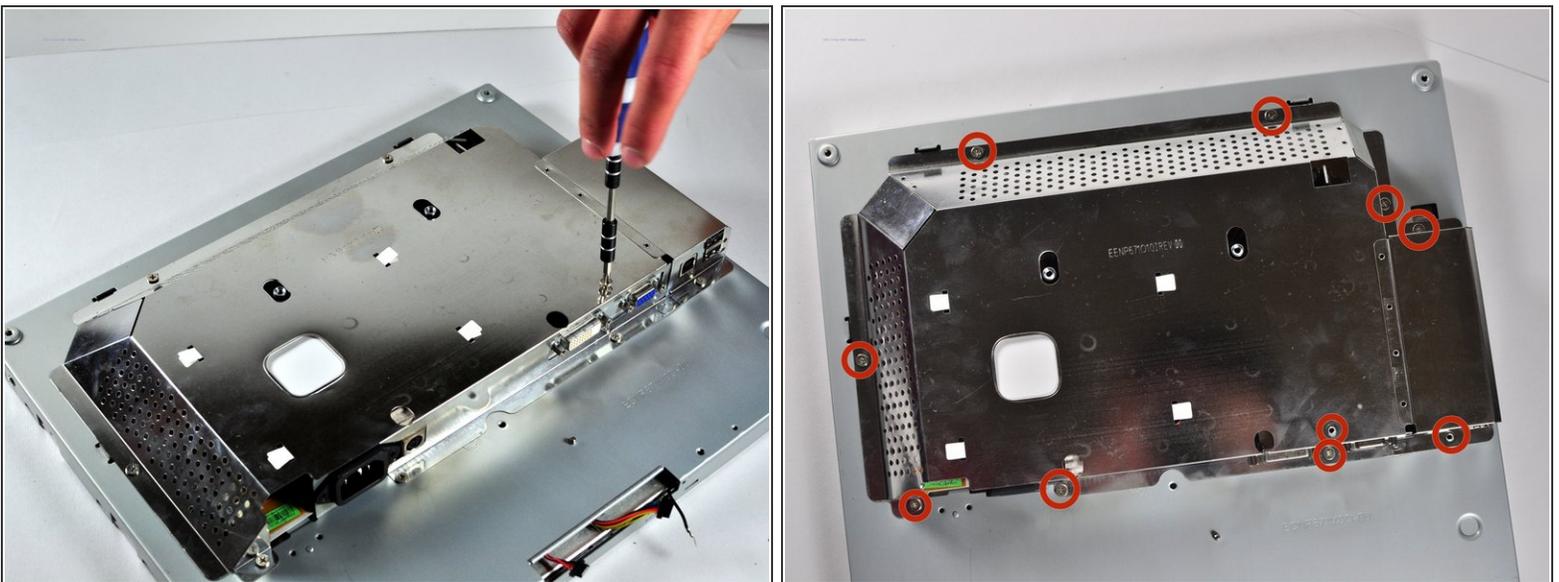

- With the monitor face-down, unscrew the 5 7mm Phillips PH2 screws around the outside of the enclosure.

Step 11

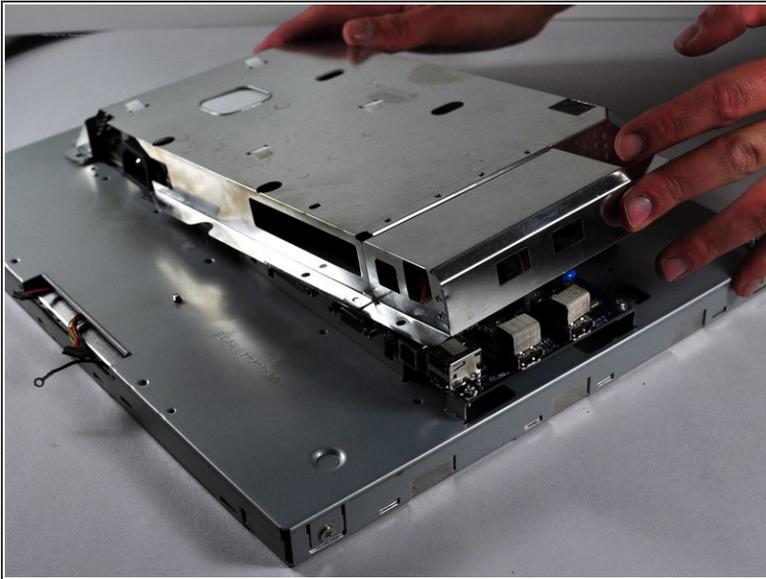

- Unscrew the 2 14.5mm Phillips PH2 screws located on the raised center of the enclosure.
- Carefully pull the enclosure off the monitor.

Step 12

- Unscrew the 10 5mm Philips PH2 screws holding the metal casing to the monitor.

Step 13

- Pull the the metal casing off of the monitor to reveal the motherboards.

To reassemble your device, follow these instructions in reverse order.
