# OPPO N1 Battery Replacement

You will learn how to safely and efficiently...

Written By: Joshua Stone

INTRODUCTION

You will learn how to safely and efficiently remove the battery of the Oppo N1 smart phone.
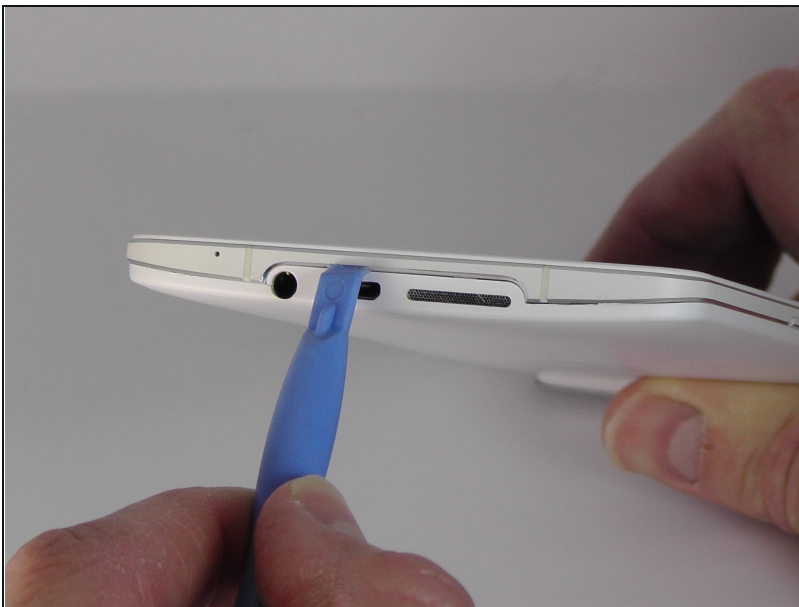

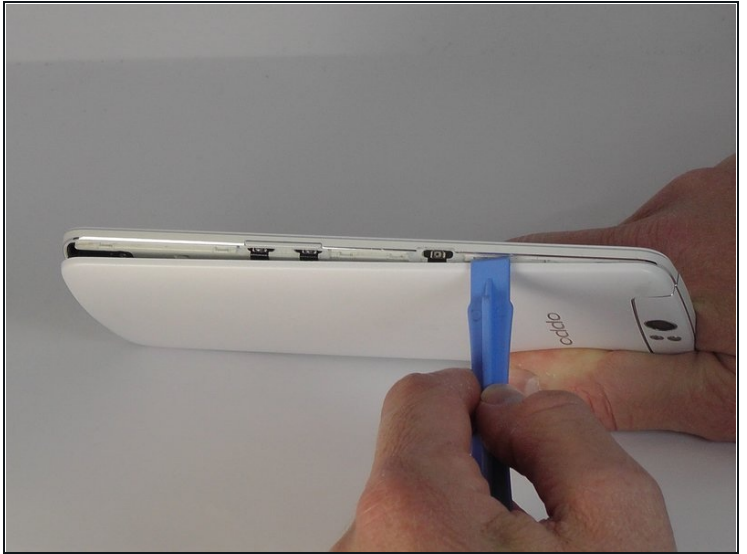

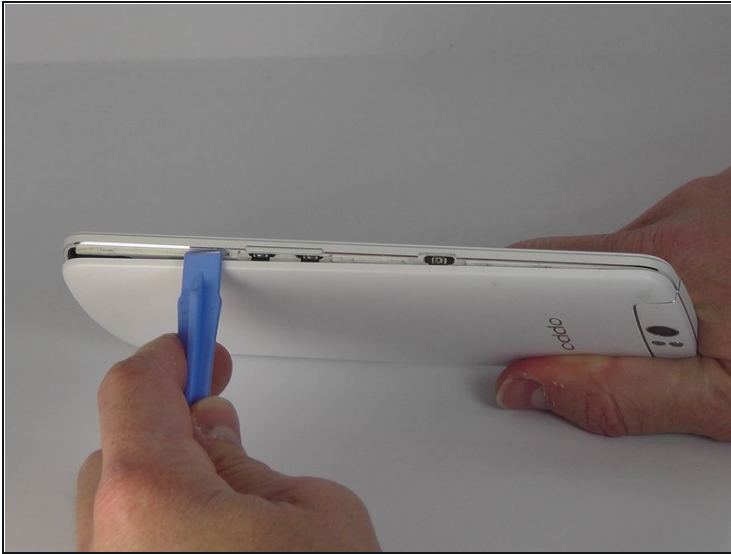

Step 1 — Rear Case

- Insert the plastic opening tool into the crevice. The back cover is most easily opened by starting at this location.
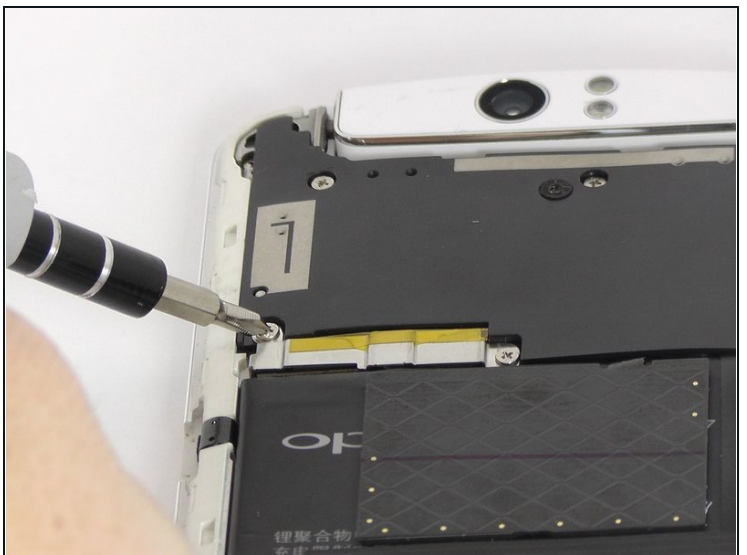

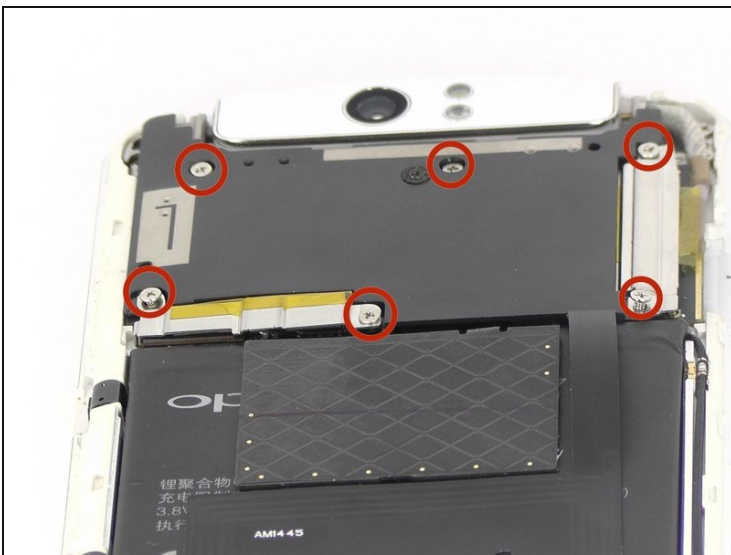

Step 2

ⓘ In the photo we rotated the phone ninety degrees counterclockwise.

● Gently slide the plastic opening tool around the edge of the phone to release the back cover from the phone. You may hear some snapping noises as you release the back cover.

● The rear case should then come free.
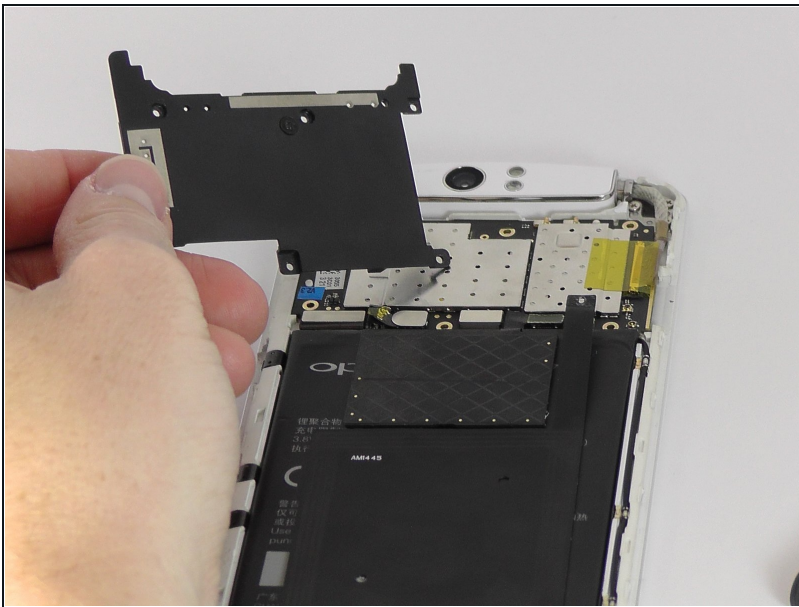

Step 3 — Battery

● Remove the six 4mm long screws holding the motherboard in with the ph0 Phillips head screw driver.
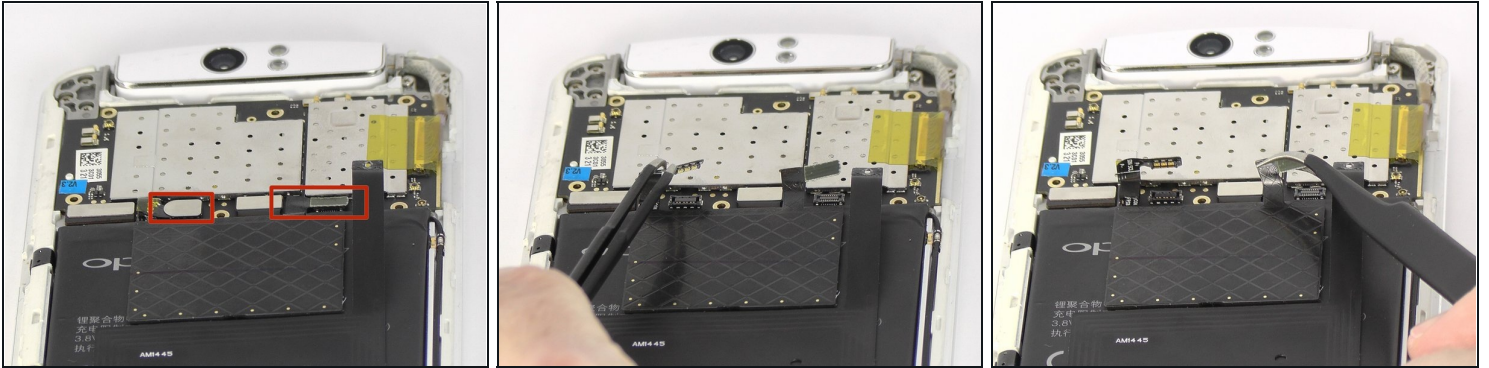

Step 4

- Use the [tweezers](#) or your fingers to remove the sliver plates.

Step 5

- Remove the black plate with your fingers.

Step 6

- Use tweezers or your fingers to pull up the connector tabs.

Step 7

- Use the blue opening tool to carefully pry the battery from the sticky tape that attaches it to the device.

To reassemble your device, follow these instructions in reverse order.
