

Kyocera QCP-2035 Battery Replacement

Replace the battery that is no longer holding a charge.

Written By: Scott Whitney

INTRODUCTION

This is a quick and simple replacement. There are no special tools needed.

PARTS:

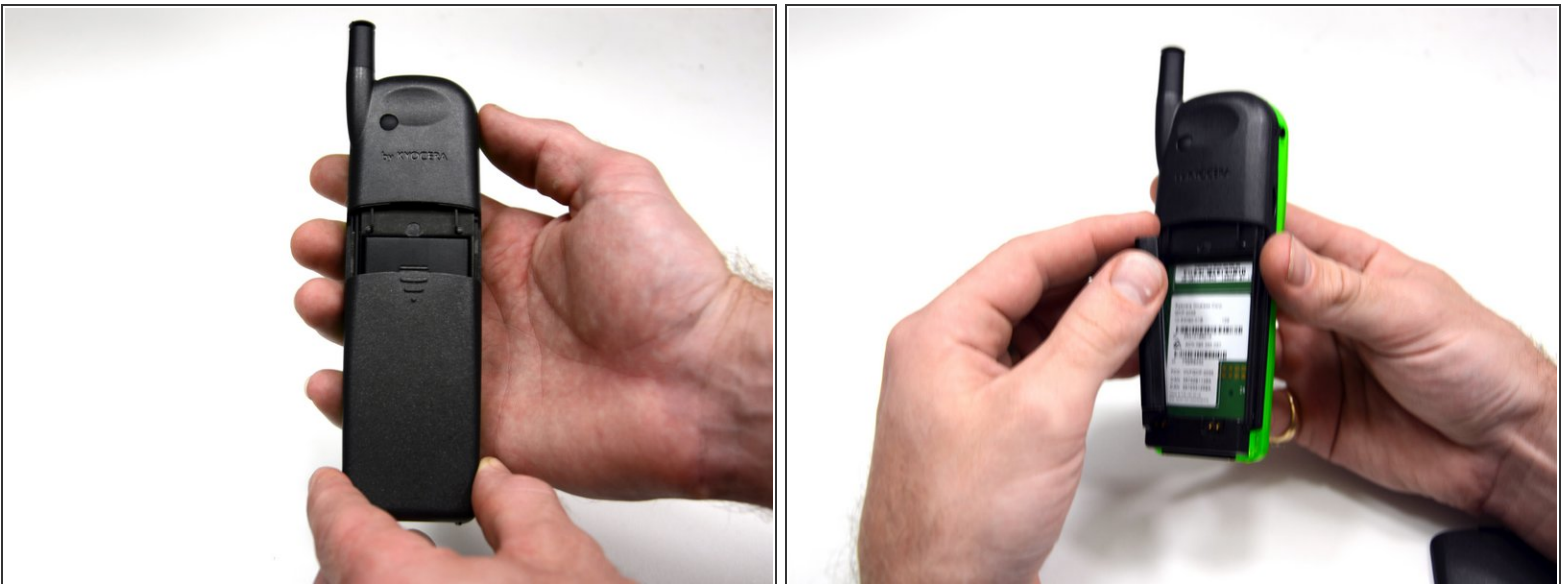

- [Kyocera QCP-2035 Battery 3.7v](#) (1)
-

Step 1 — Removing Back Cover

- When looking at the back of the phone, you will see a horizontal line and three raised segments of plastic in the form of a triangle.
- Place thumb on top of the triangle and press into the phone while sliding your thumb towards the bottom of the phone.
- In 5 mm it will stop sliding.

Step 2

- Grab the bottom of the back cover with your other hand and pull the cover the rest of the way off.
- Turn the phone over slowly. The battery will fall out on its own.

To reassemble your device, follow these instructions in reverse order.
