

# Sony Alpha NEX-6 Lens Replacement

A quick and easy guide to managing the camera lens.

Written By: Clayton Dale

## INTRODUCTION

This guide provides a step-by-step procedure for safely removing the lens of a Sony Alpha NEX-6 camera.

## Step 1 — Finding the Release Button

- Turn the camera with the lens facing **up**.
- Find the *lens release button* - located along the side of the *silver lens mount*.

## Step 2 — Removing the Lens

- Press and hold the *lens release button* while rotating the lens **counterclockwise**.
- Lift the lens when it is no longer attached to the camera.
- ☒ To replace the lens, align the white dot on the lens with the white dot located on the silver lens mount. (See image two)
- ☒ Insert the lens and rotate it clockwise until it is locked in place.

The procedure to disassemble this lens is different from reassembly. This guide encompasses both processes.
