

Repairing Sony Cyber-shot DSC-W290

Motherboard

This guide will walk you through the steps required to replace the Sony Cyber-shot DSC-W290's motherboard

Written By: Evan Mayer

INTRODUCTION

Thorough knowledge of disassembling the camera is necessary for replacing the motherboard.

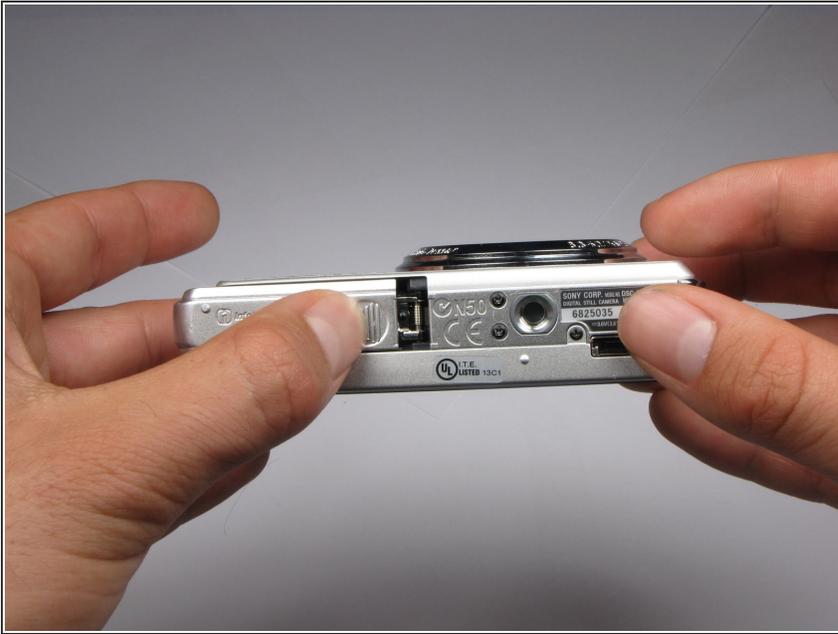

TOOLS:

- [Soldering Workstation](#) (1)
- [Phillips #0 Screwdriver](#) (1)
- [Tweezers](#) (1)
- [Desoldering Braid](#) (1)

PARTS:

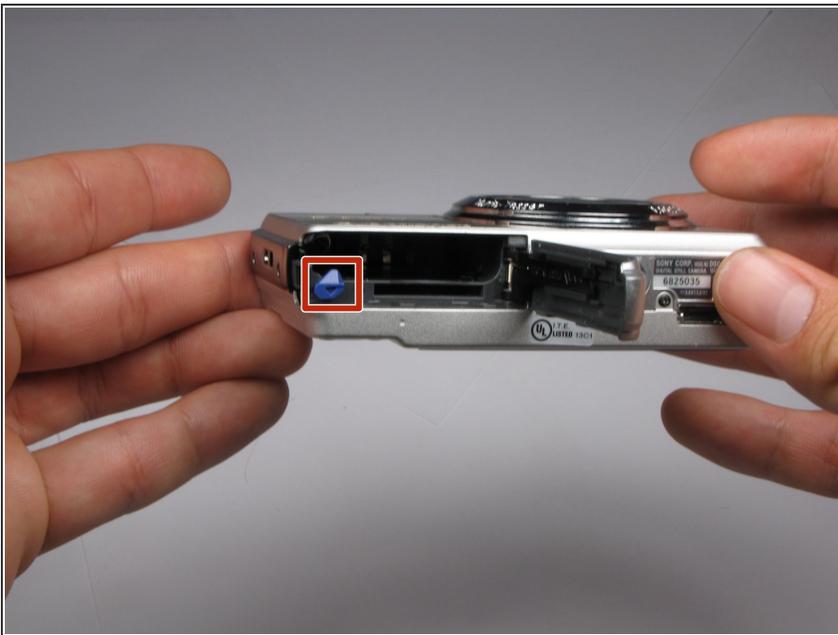

- [Sony Cyber-shot DSC-W290 Logic Board](#) (1)

Step 1 — Battery

- Find the hatch labeled "open" on the left side of the bottom of the camera.
- Slide the hatch in the direction that the arrow is pointing. The hatch will open outward on its own.

Step 2

- Slide the blue locking tab to release the battery.
- Slide the battery out of the camera.

Step 3 — Outer Casing

- Replace hatch and rotate camera 180 degrees. You should still be looking at the bottom of the camera.
- Remove the four 2.5mm Phillips #0 screws.

Step 4

- Turn the camera so the left side-panel reading "5x Optical Zoom" faces you.
- Remove the two 2.5mm Phillips #0 screws.
- ⓘ You may have to remove the screws with a pair of tweezers when the screws are almost out.

Step 5

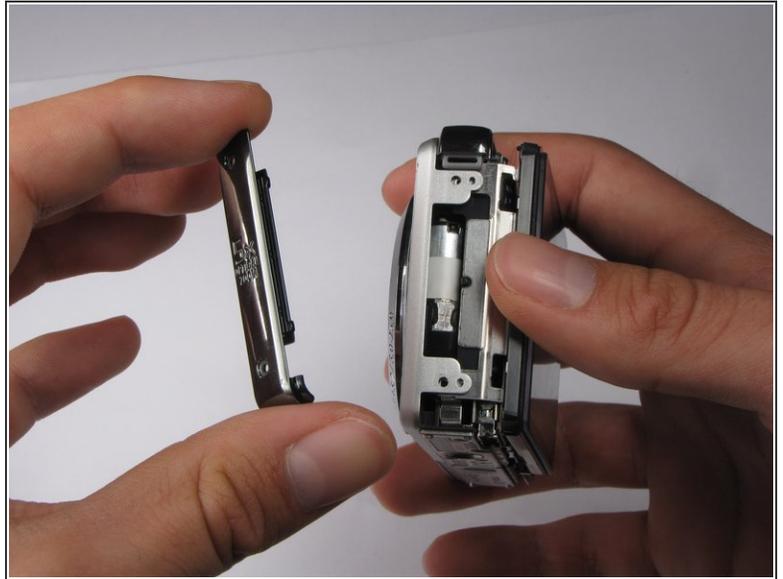

- Turn the camera so the right side faces you.
- Remove the two 2.5mm Phillips #0 screws.
- ⓘ You may have to remove the screws with a pair of tweezers when the screws are almost out.

Step 6

- Rotate camera so that the back is facing you.
- Pull the back casing directly away from the LCD screen.

Step 7

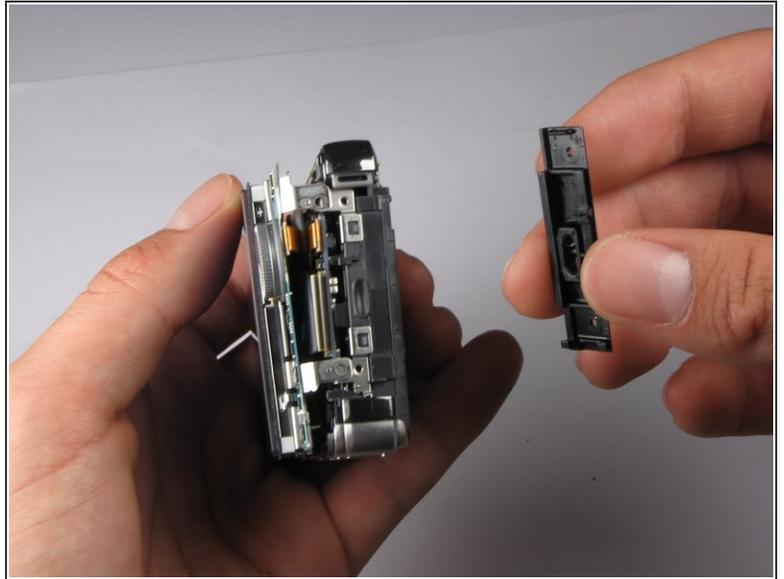

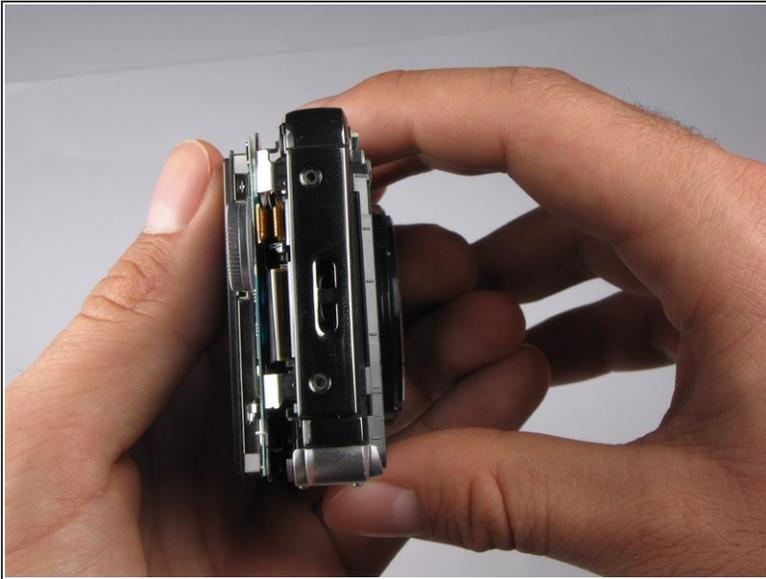

- Turn the camera so that the left side is facing you.
- Pull the left side-panel off of the camera.

Step 8

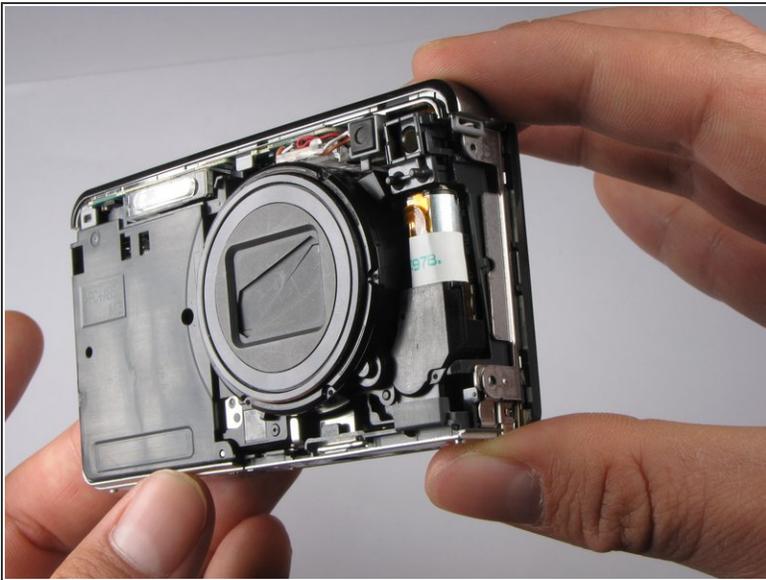

- Turn camera so that the front of the camera is facing you.
- Pull the front casing directly away from the camera.
- ⓘ The right side panel may fall off when you take the front panel off.

Step 9

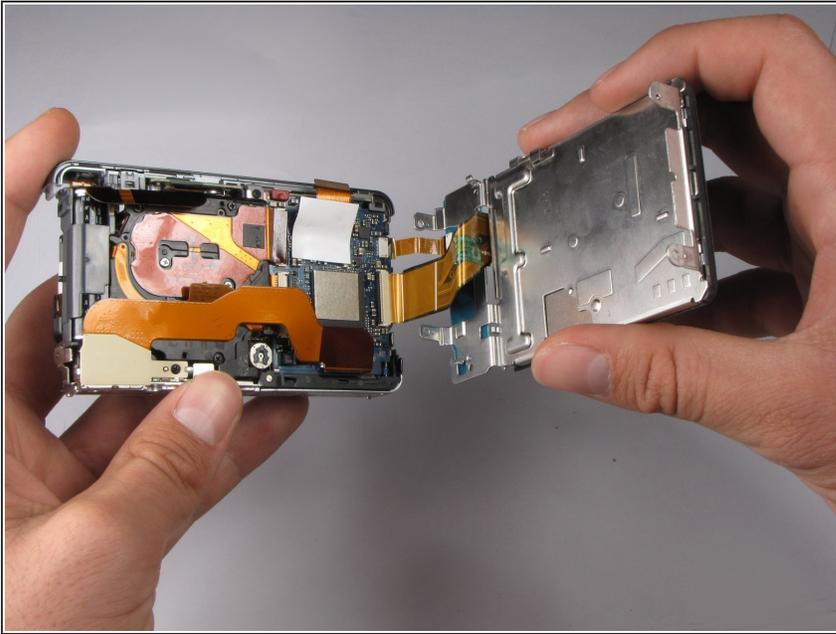

- Turn the camera so that the right side is facing you.
- Pull the right side-panel away from the rest of the camera.

Step 10

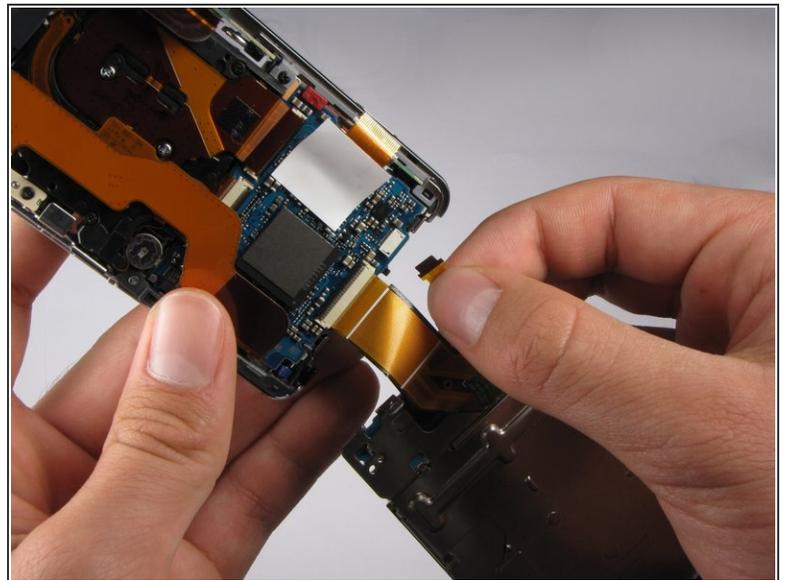

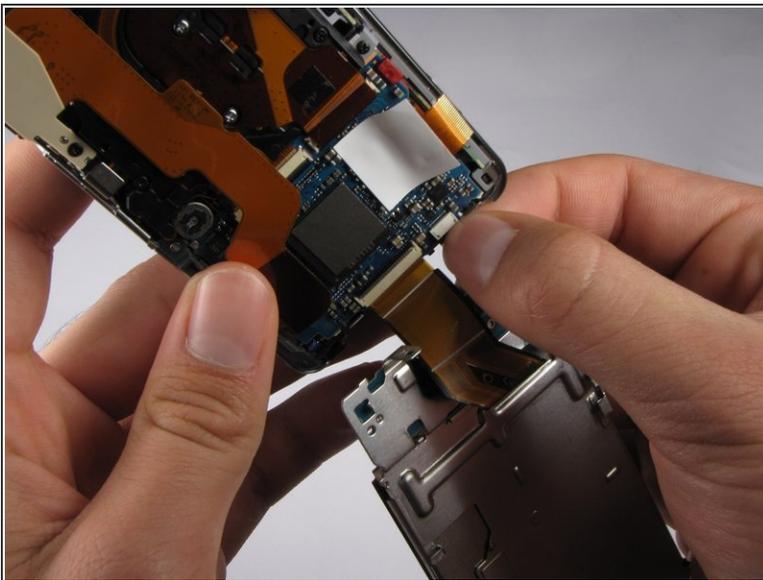

- This is what your camera should look like now that you have removed the casing from all sides.

Step 11 — LCD Assembly

- Gently pull the LCD and its casing away from the motherboard as shown.
- ⓘ Be careful not to rip out any ribbon cables.

Step 12

- Disconnect the small ribbon-wire by gently pulling on the small ribbon-wire where it connects with the motherboard.

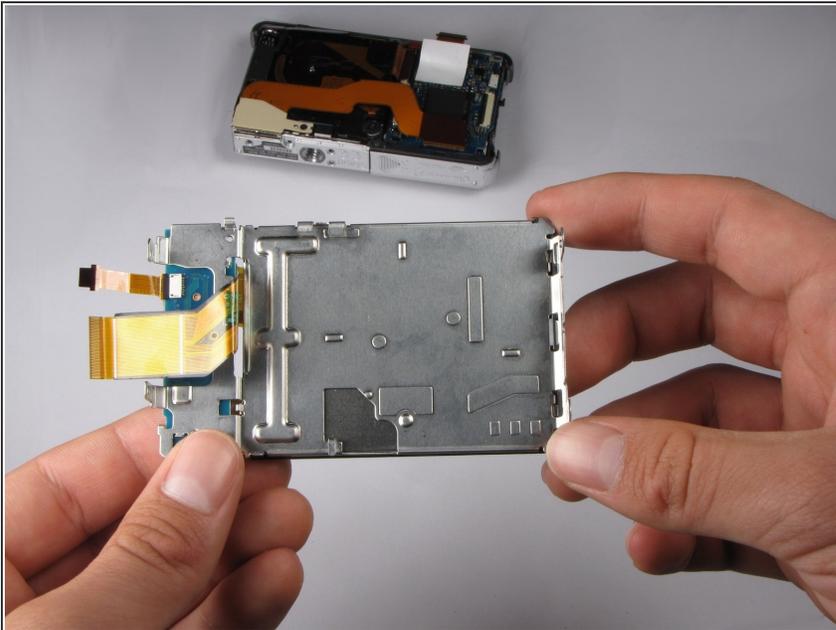

⚠ Do *not* use excessive force to remove the wire because this may cause it to tear.

Step 13

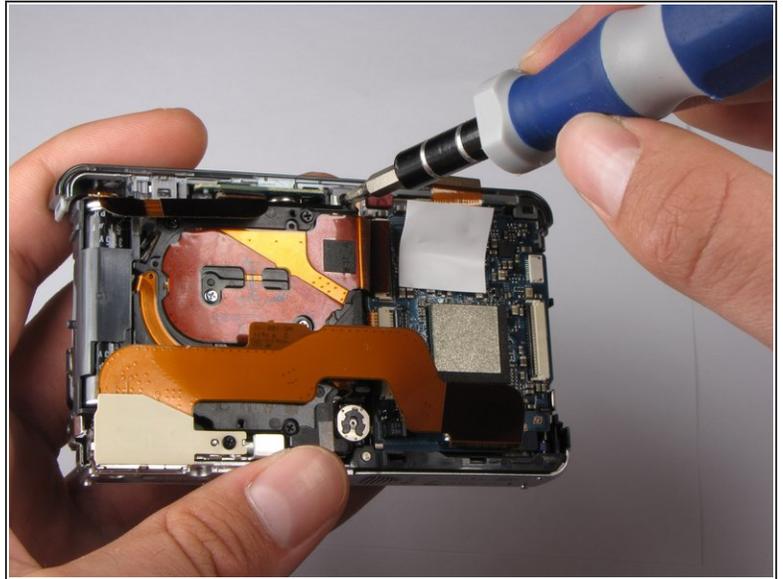

- Disconnect the large ribbon-wire by pulling on the large ribbon-wire where it connects to the motherboard.

Step 14

- Pull the LCD and its casing away from the rest of the camera.

Step 15 — Flash Bulb Assembly

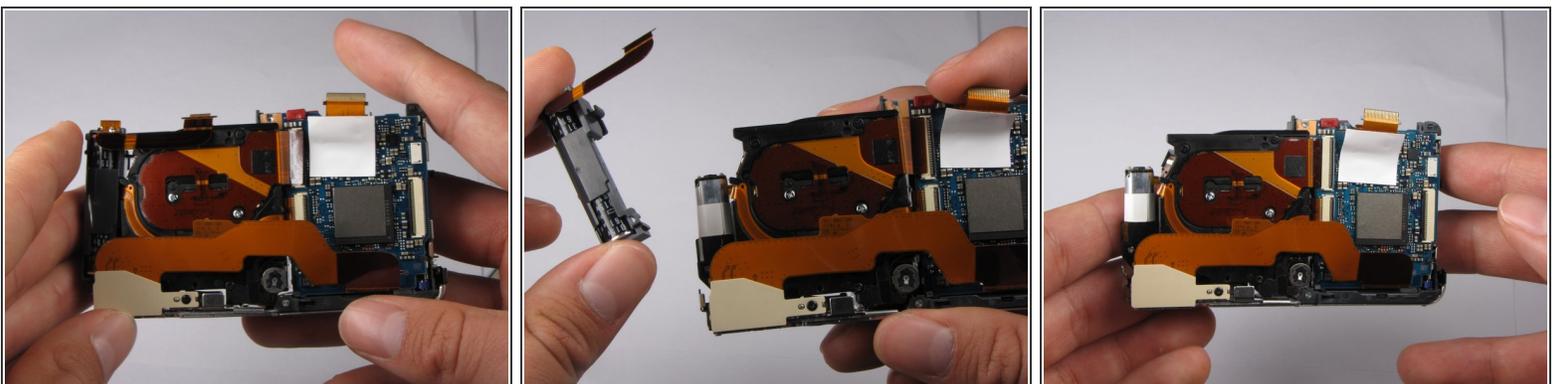

- Turn the camera so the back is facing you.
- Remove the 2.5mm Philips #0 screw at the top of the camera.

Step 16

- Tilt top casing up and towards you.
- Carefully remove the right ribbon-wire from the top camera panel by pulling where the wire connects to the top.
- ⓘ Make sure to hold the camera with your thumb on the white square to ensure the ribbon-wire is not disconnected from the motherboard.
- Carefully remove the left ribbon-wire from the top camera panel by pulling where the wire connects to the top.

Step 17 — Lens Assembly

⚠ Flash capacitors are dangerous! Be *extremely* careful when removing the capacitor from the camera. You can get shocked *BADLY*!

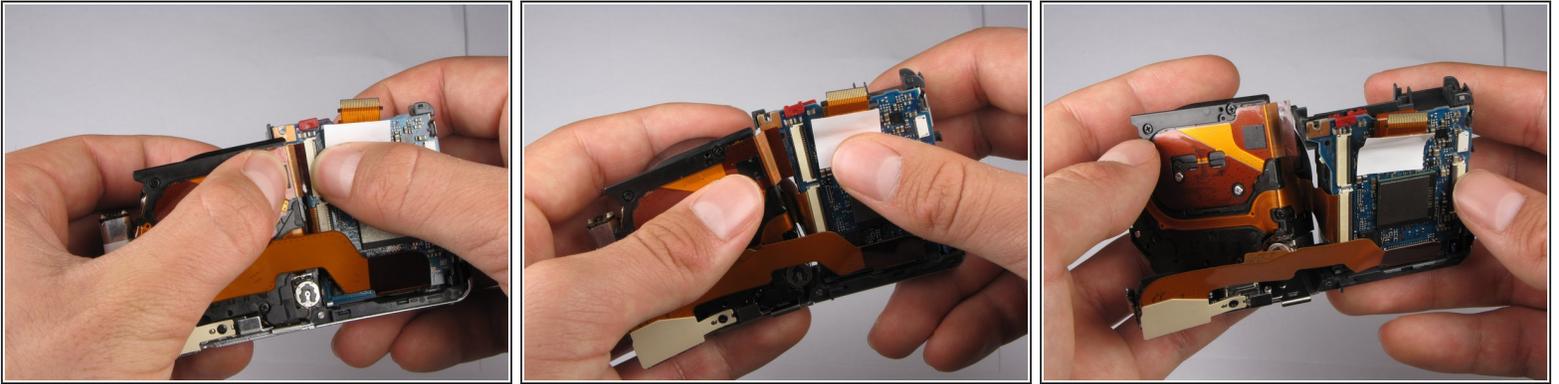

- Remove the flash capacitor from the lens assembly.

Carefully place the flash capacitor away from where you are working.

Step 18

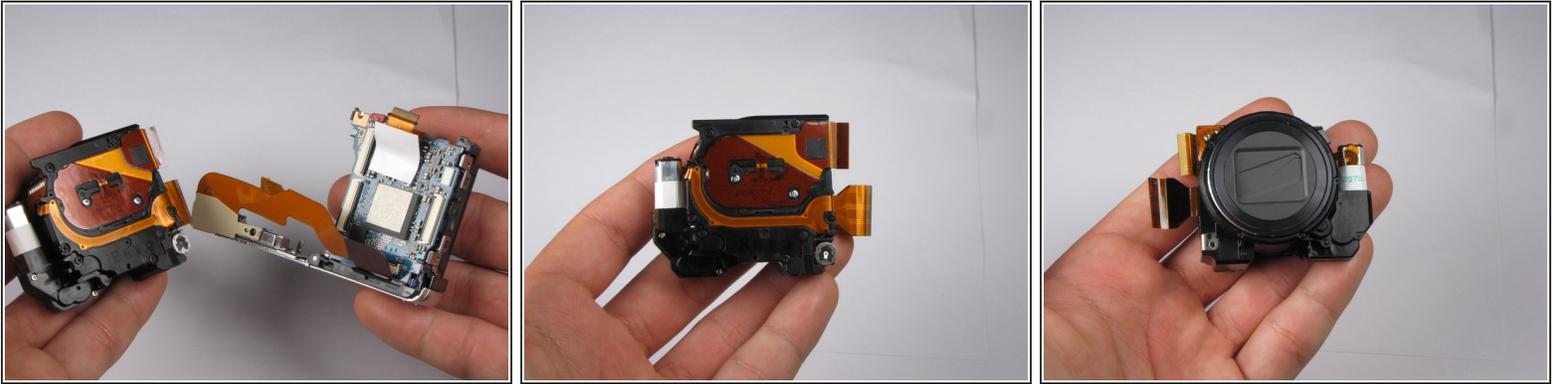

- Carefully disconnect the top ribbon-wire from the motherboard by pulling where the wire connects to the motherboard.

Step 19

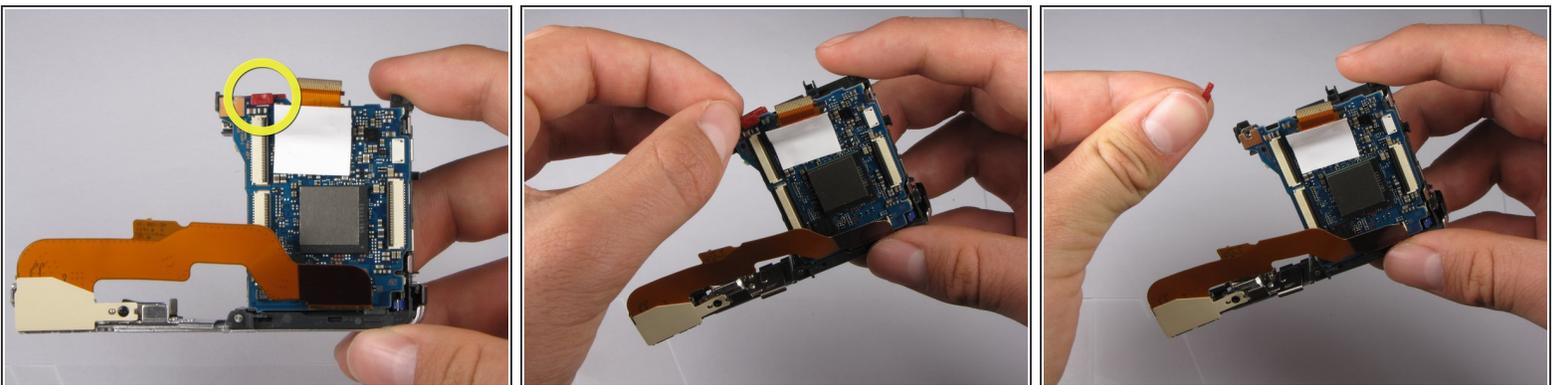

- Disconnect the top remaining ribbon-wire by carefully pulling at the base of where the wire connects to the motherboard.

Step 20

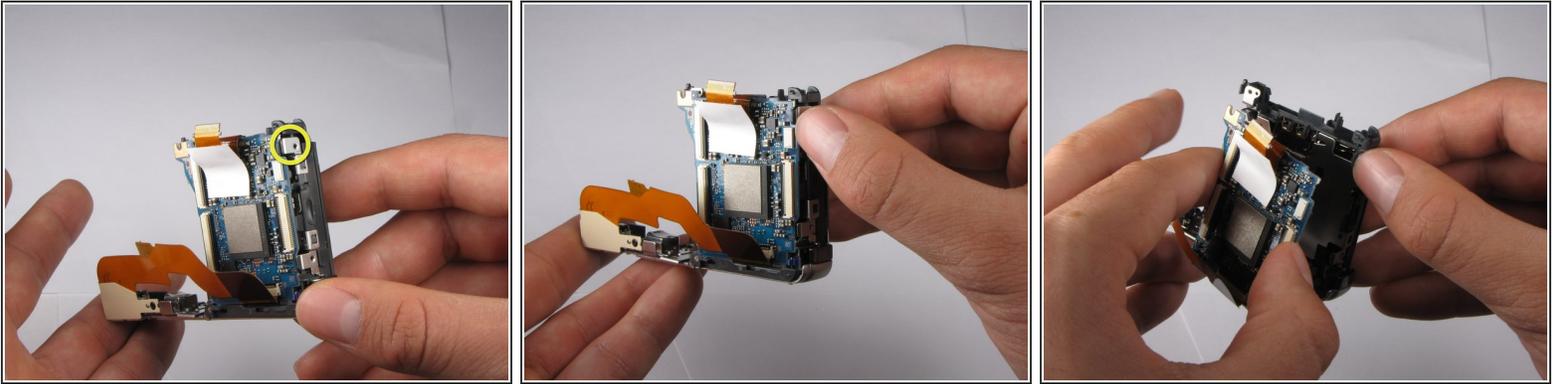

- Pull the Lens Assembly away from the motherboard.
- You have now removed the Lens Assembly from the camera.

Step 21 — Motherboard

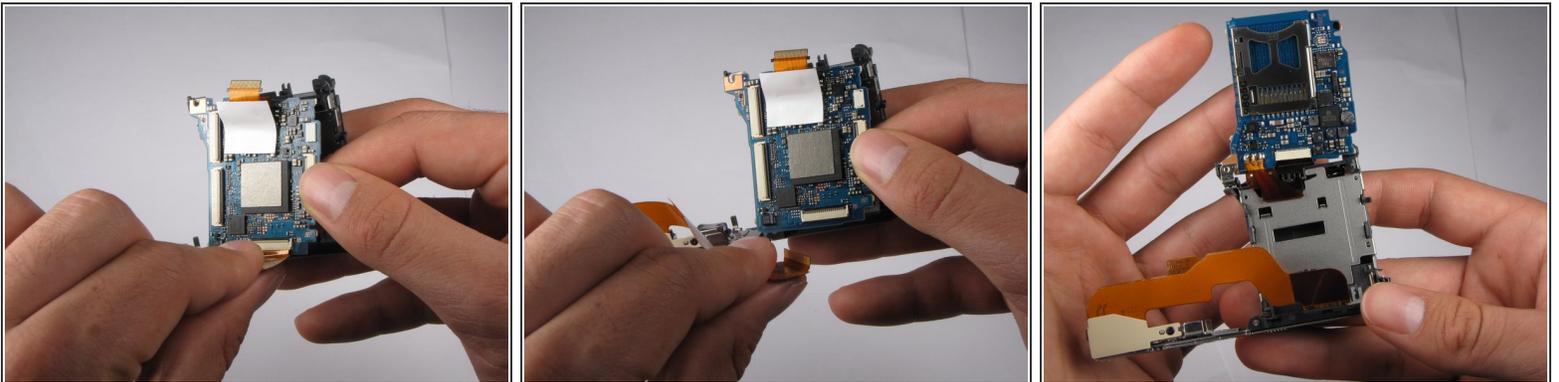

- Remove the red clip that holds the motherboard to its casing.

Step 22

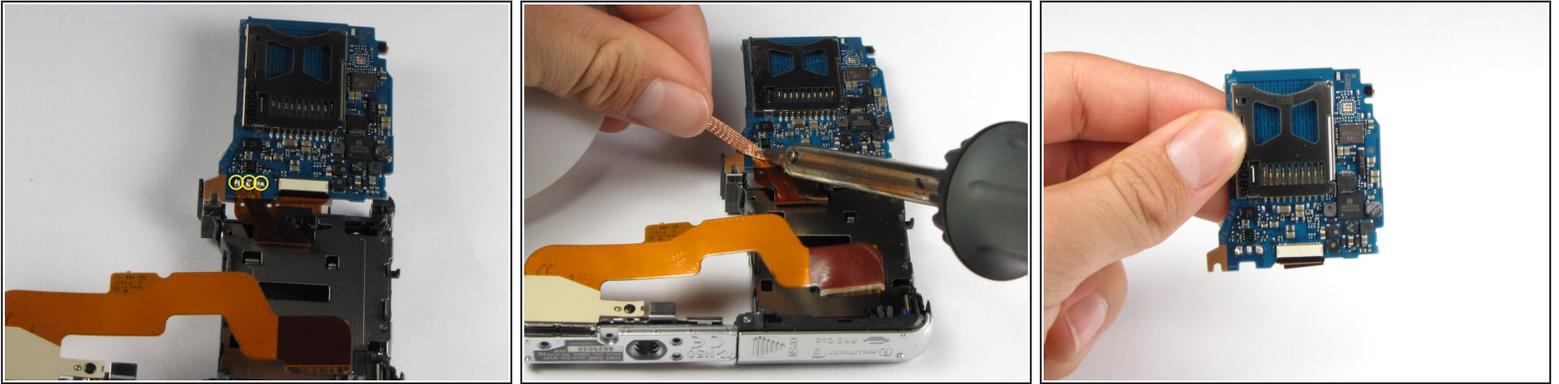

- Pull back the small gray clip located on the right side of the camera to release the motherboard from its casing.

Step 23

- Lift the motherboard from the casing.
- Carefully remove the large ribbon-wire by pulling the wire where it connects with the motherboard.
- ⓘ In order to completely remove the motherboard, you must desolder the small ribbon wire from the casing.

Step 24

- Flip the motherboard up to turn it over.
- ⚠ When de-soldering, be careful not to burn yourself or the motherboard. You can damage or destroy the motherboard or the ribbon wire by applying too much heat.
- Carefully de-solder the three connectors from the ribbon wire to the motherboard.
- You have now removed the motherboard.

To reassemble your device, follow these instructions in reverse order.
