INTRODUCTION

This guide will instruct the user on how to remove the front cover of the Canon A590 IS.

🔧 TOOLS:

- Phillips #00 Screwdriver (1)

This document was generated on 2022-12-22 09:04:31 AM (MST).

Step 1 — Batteries

ⓘ The battery hatch is on the bottom of the camera.

⚠ CAUTION: Locate the switch to open the hatch and push gently toward the front of the camera. Too much force can break the hatch.

● While the switch is pushed forward, pull the cover away from the camera.

Step 2

ⓘ This camera requires AA batteries.

● To remove batteries, simply allow them to fall out of the camera.

● Use a fingernail to lift the clock battery out of the camera.

Step 3

📌 When replacing the AA batteries, verify they are oriented correctly by following the (+) and (-) signs on the camera.

Step 4 — Back Cover

● Remove the screw located under the rubber flap on the left side of the camera using a Phillips #00 screwdriver.

Step 7

- Open the battery cover.

- Using the iFixit opening tool, push up gently around all edges of the camera.
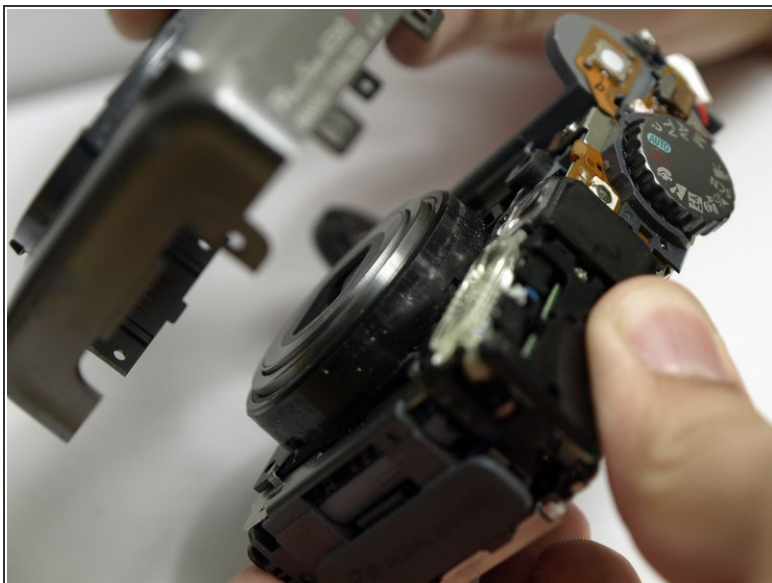

Step 8 — Remove Lens Cover

- Press and hold down the button shown in the blue circle.

- While pressing the button, rotate the lens cover in a counter-clockwise direction to remove it.
