

Aiptek Pocket DVII 1.3M LCD Lens Assembly Replacement

If our lens replacement guide didn't resolve the problem, follow this guide to replace the lens assembly.

Written By: Gyoza Aba Hivatal

 **TOOLS:**

- [Essential Electronics Toolkit \(1\)](#)
-

Step 1 — Lens Assembly

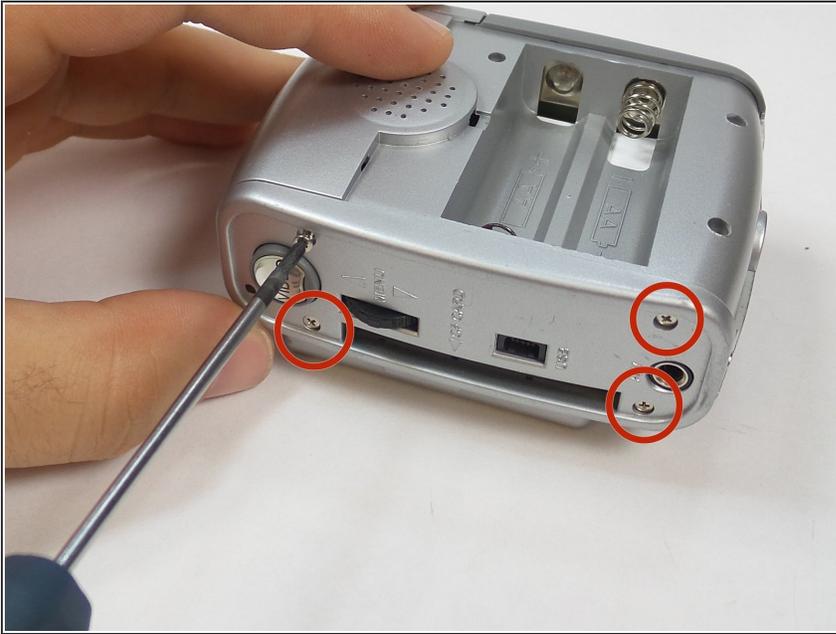

- Remove the battery cover.
- Remove the batteries.

Step 2

- Unscrew the three 4mm screws from the battery side of the device. Use a Phillips screw driver.

Step 3

- Remove the four screws from the back side.

Step 4

- Remove the sticky black dots.
- Remove the hidden screw.

Step 5

- Remove the two screws from the top side of the device.
- Remove the two screws from the bottom side of the device.

Step 6

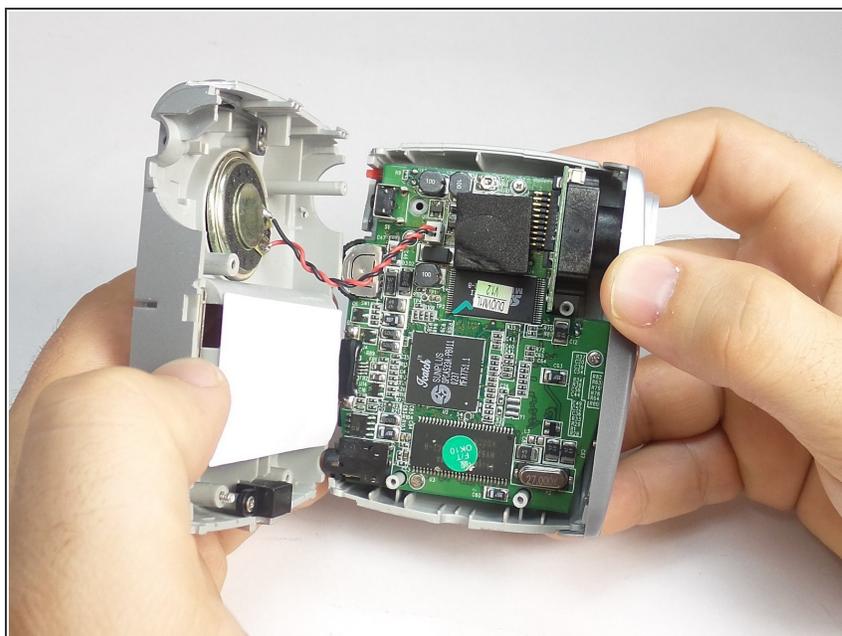

- Remove the rear cover.
- ⚠ Be careful not to lose the spring inside.

Step 7

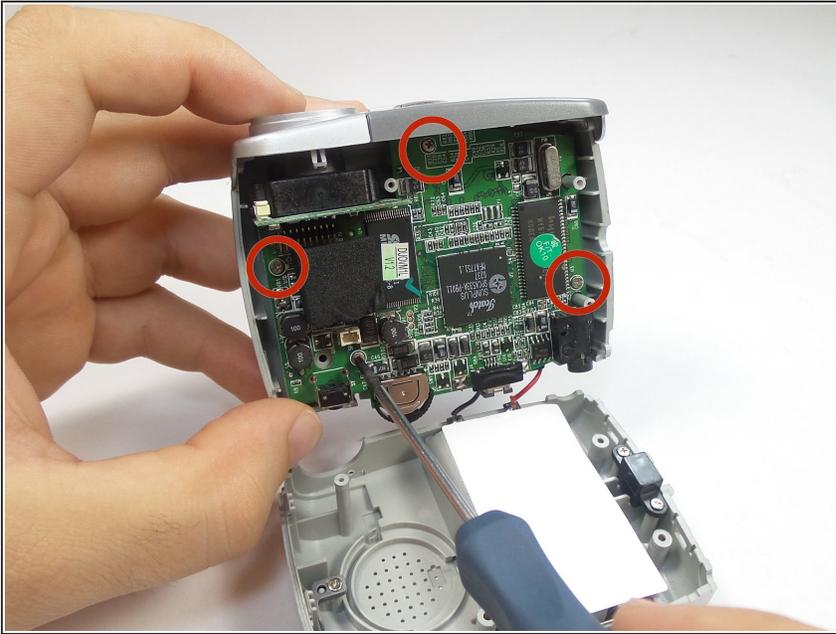

- Pull back the front cover so that you can dislodge the side cover.

Step 8

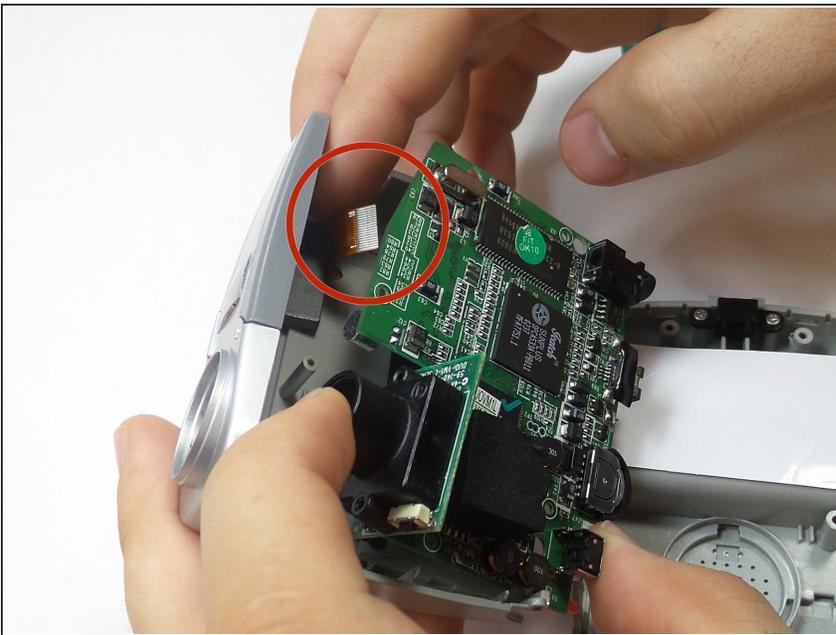

- Unfold the device and be careful not to tear the black and red power supply wires.

Step 9

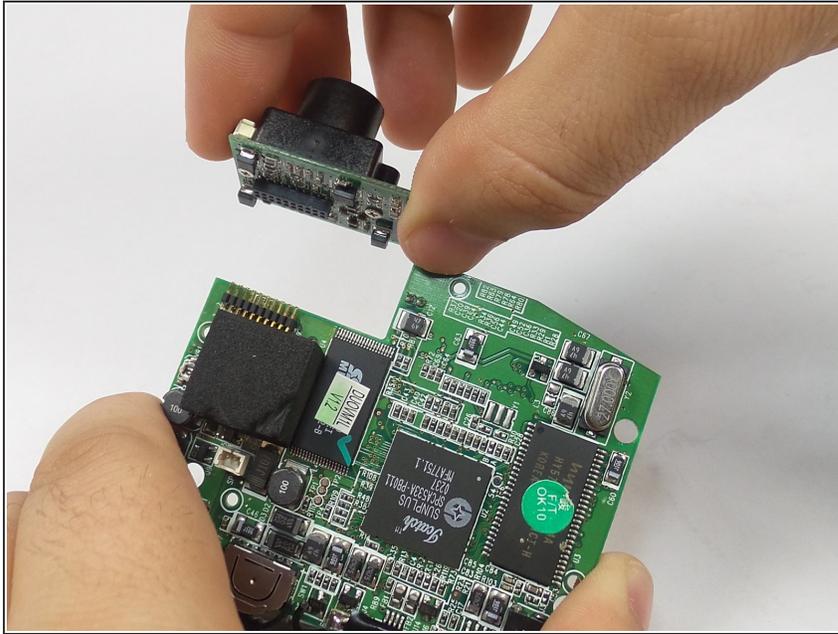

- Remove the four screws from the motherboard.

Step 10

- Take out the motherboard while disconnecting the flip screen's cable from underneath.

Step 11

- Replace the Lens Assembly board.
- ⚠ Be careful not to damage any of the pins. Pull the board linearly.

To reassemble your device, follow these instructions in reverse order.
