Headlight Replacement

Replace your headlights to illuminate the road once again.

Written By: Liam Martinez

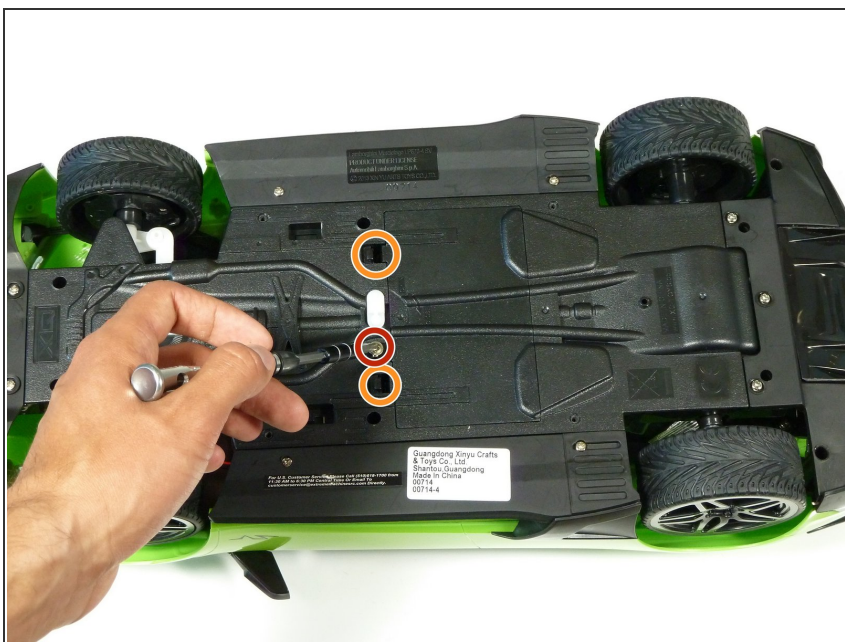

INTRODUCTION

The headlights illuminate while the car is moving forward, and can be useful for seeing the road ahead. A disconnected wire or blown light will make the light not die and will need replacing.

TOOLS:

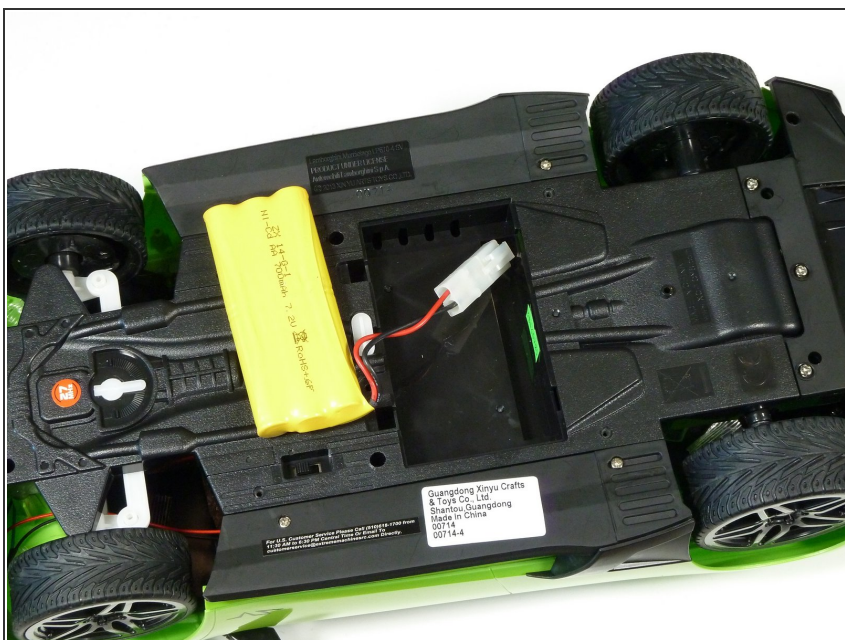

- [Phillips #00 Screwdriver](#) (1)
 - [Soldering Workstation](#) (1)
-

Step 1 — Battery

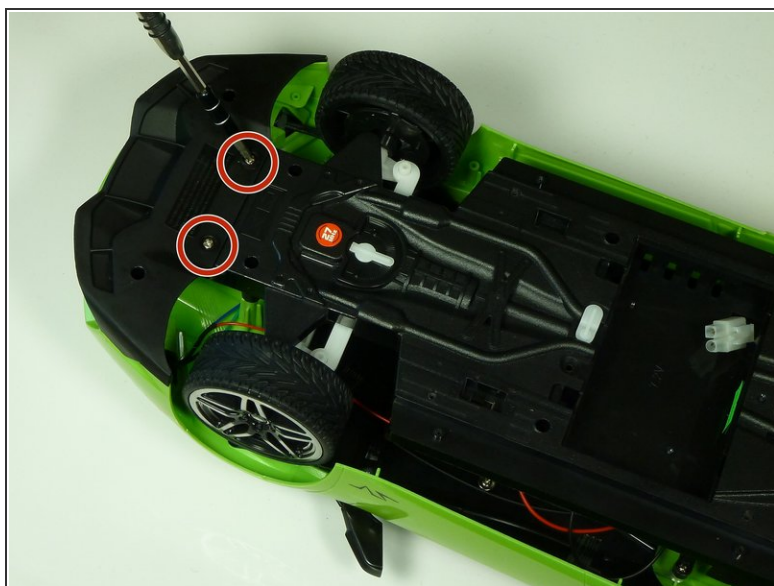

- Unscrew the two 2.5mm Phillips #00 screws from the middle of the car.
- Unclip the two clips to remove the battery cover.

Step 2

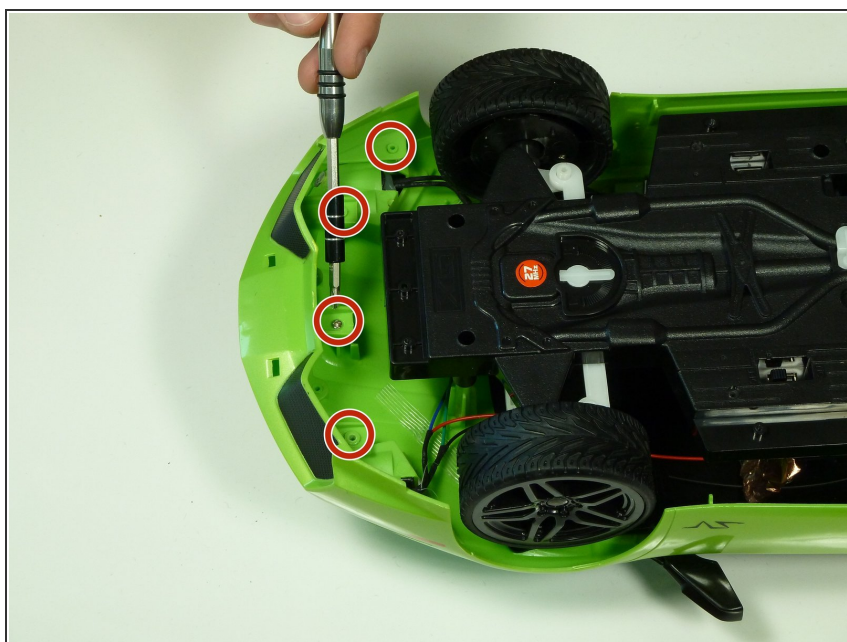

- Unplug the battery by pushing on the clip.

Step 3 — Headlight

- Unscrew the two 2.5 mm Phillips #00 screws from the underside of the car and remove the front underskirt.

Step 4

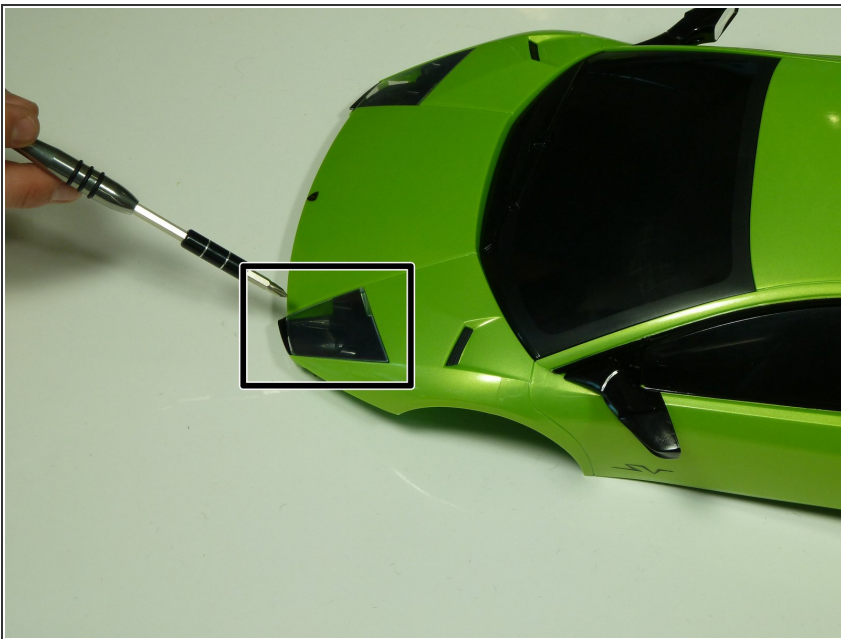

- Unscrew the four 2.5mm Phillips #00 screws from the front bumper and lift up the front bumper to remove.

Step 5

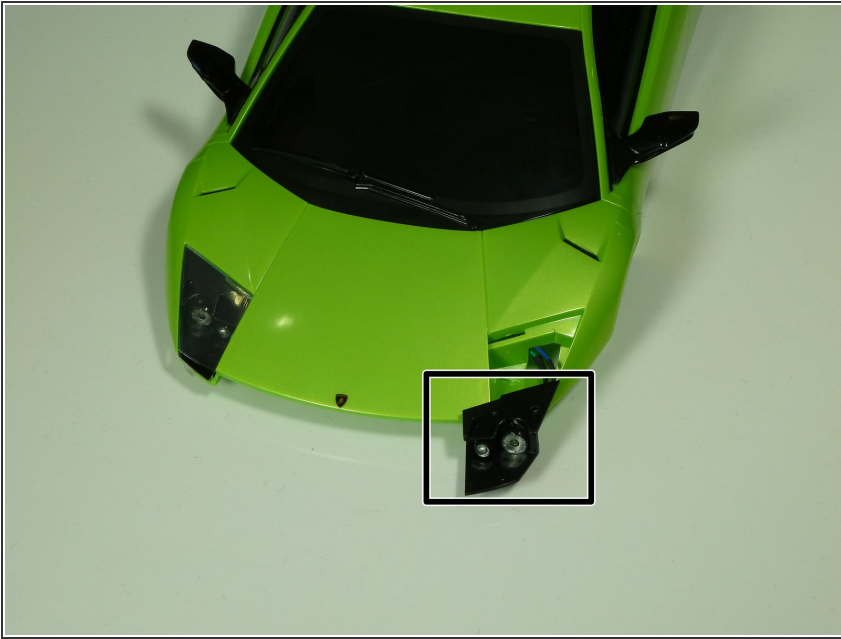

- Remove the front bumper by sliding it away from the car.

Step 6

- Remove the headlight cover.

Step 7

- Pull out the headlight.
- Desolder and disconnect the headlight

To reassemble your device, follow these instructions in reverse order.
