

Minolta Maxxum STsi Clock Battery Replacement

If the camera's internal clock has stopped...

Written By: Conner Lawston

INTRODUCTION

If the camera's internal clock has stopped working or showing time, it may be necessary to replace the clock battery on the inside of the camera.

TOOLS:

Coin (1)

Tweezers (1)

Step 1 — Clock Battery

- Press up firmly on the back-cover release on the right side of the camera to release the back panel.

Step 2

- Use a coin to twist open the battery compartment (twist counterclockwise).

Step 3

- Use [tweezers](#) to lift off the battery compartment cover.

Step 4

- Use tweezers to take out the old clock battery and replace it with a new one.

To reassemble your device, follow these instructions in reverse order.
