

LG G Watch R Back Case Replacement

The back case will need to be removed to access the interior components of the watch.

Written By: Westley Courchene

INTRODUCTION

In addition to protecting the internal components of the watch, the back case also fastens the power charging conductor and heart rate monitor to the watch's motherboard.

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [T4 Torx Screwdriver](#) (1)
-

Step 1 — Back Case

 Power off your watch before disassembling it.

- Place the watch upside down on a hard surface so that its back case is facing upright.
- Use a T4 Torx Star screwdriver to remove the four 4.0 mm Torx screws from the corners of the back case.

Step 2

- Use a plastic opening tool to pry open the back case from both sides of the watch.

Step 3

- Remove the back case.

To reassemble your device, follow these instructions in reverse order.
