

# Ninja Professional Blender 1100 watt Blade Replacement

This guide will help with replacing a worn out blade housing.

Written By: Elizabeth Hernandez

## INTRODUCTION

The Ninja Professional Blender 1100 watt blade housing is simple to replace and can be accomplished by any Ninja user.

## Step 1 — Blades

- Unplug blender.
- Remove the pitcher from the base by turning it counter clockwise so the pitcher is not aligned with the arrows on the base.

## Step 2

- Press the release button on top of the lid.
  - Pull the lid off.
- i** Use both hands when taking off the lid. You may need to pull hard if there is water between the lid and the pitcher, which will create a tight suction.

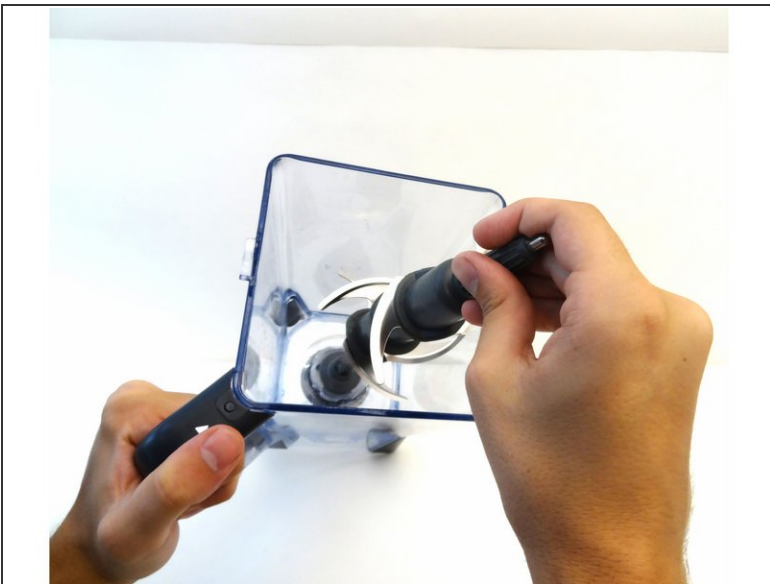

### Step 3

Blades are very sharp.

- Use one hand to pull the blade housing out of the pitcher while using the other hand to hold onto the pitcher handle.

### Step 4

- Insert the new blade house into the pitcher and align it so it fits onto the mounting gear.

To reassemble your device, follow these instructions in reverse order.
