## INTRODUCTION

In this guide, you will learn how to replace the battery in your Samsung Galaxy Camera 2.

Replacing the battery of the camera can fix a number of problems, including the camera not holding a charge, the camera not charging, or the camera not powering on. Removing the battery is also a necessary step in disassembling the camera for other repairs.

### TOOLS:

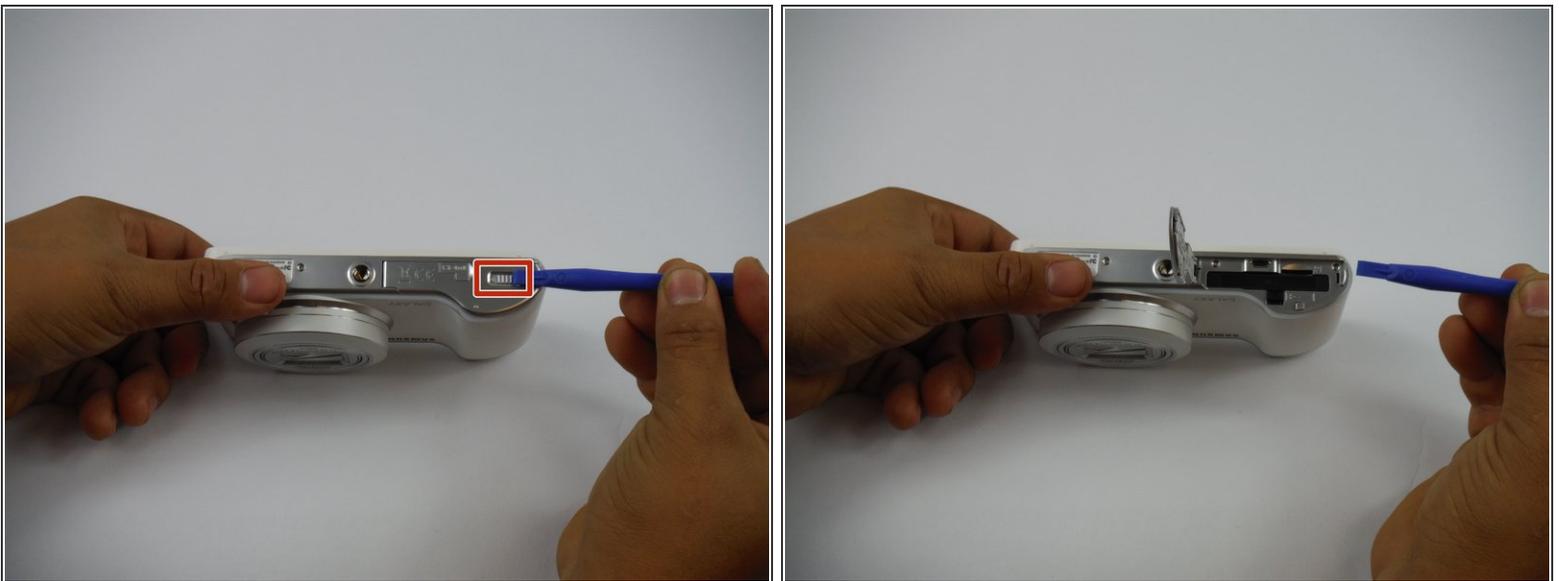

- [iFixit Opening Tools](#) (1)
-

## Step 1 — Battery

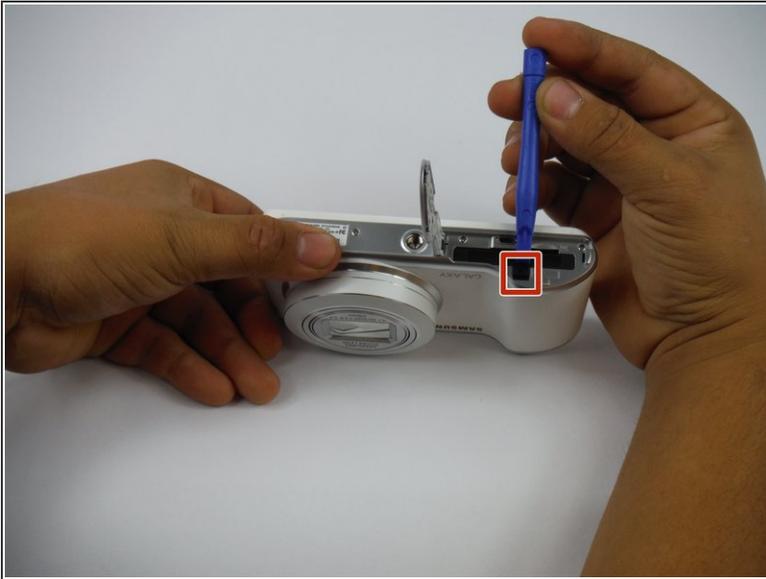

- Face the camera towards you, then rotate it such that the battery door is facing up and to the right.

## Step 2

- Locate the small latch on the right side of the camera.
- Slide the latch to the left to open the battery compartment door.

### Step 3

- Locate the battery, a black cell held in by a small clip (indicated by an out-facing arrow).
- Pull the clip toward you to release the battery.

### Step 4

- Remove and discard the old battery.
