

ATT CL2940 Batteries Replacement

This guide will help in replacing the batteries.

Written By: Charles Messmore

INTRODUCTION

If there is a problem with the power, one of the easiest solutions is to replace the batteries. Use this guide to assist with this.

Step 1 — Batteries

- Flip the phone over and push the tabs upward to release the battery cover.

Step 2

- Place four AA batteries in the battery compartment. Position the negative end (-) at the side with the spring as shown.

Step 3

- Replace the battery cover.

i You should hear a "click" sound when the battery cover is fixed in place.
