

LG Realm Plastic Midframe Replacement

This guide will show you how to take off the plastic midframe in order to access pieces underneath it.

Written By: Ryan St Martin

INTRODUCTION

Before continuing, make sure the device is powered down.

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [Phillips #000 Screwdriver](#) (1)
-

Step 1 — Battery

- To remove the back, insert thumbnail into MicroUSB port, and pull up to loosen back.
- Use nail to loosen case on all four sides. Once loose, remove back case.

Step 2

- Insert thumbnail into tab below battery.
- Pull away from phone and remove.

Step 3 — Plastic Midframe

- Once the back cover and battery are removed, use the Phillips #J000 screwdriver to remove all 11 screws located around the plastic midframe.

Step 4

- Using the plastic opening tool, carefully pry and separate the plastic midframe from the rest of the phone.

To reassemble your device, follow these instructions in reverse order.
