

Nexus 10 Front Facing Camera Replacement

Replace the front-facing camera of the Nexus 10.

Written By: Benjamin Troller

 **TOOLS:**

- [iFixit Opening Tools](#) (1)

 **PARTS:**

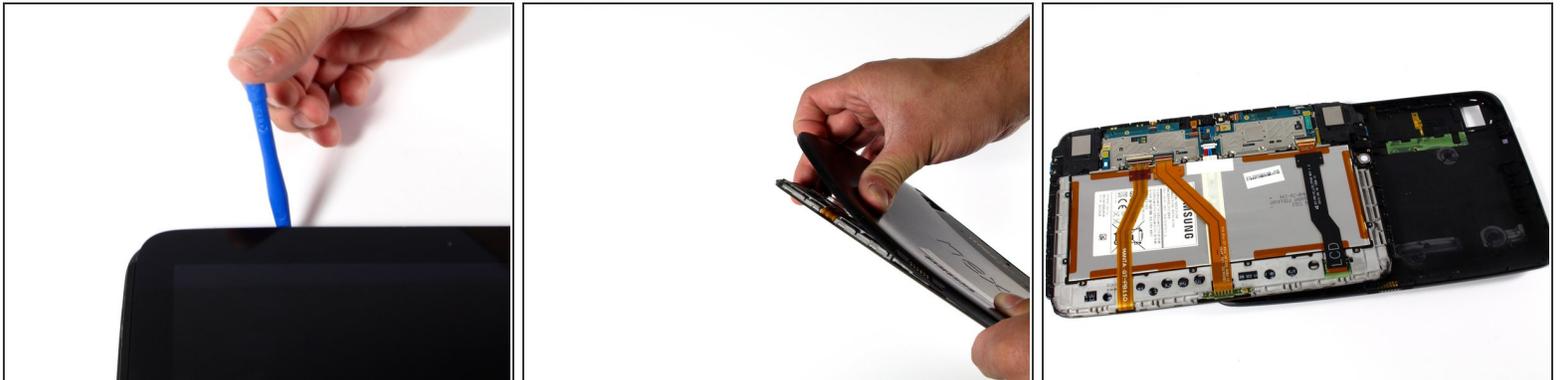

- [Nexus 10 Front Camera](#) (1)
-

Step 1 — Front-Facing Camera

- Remove the plastic cover located on the back of the device by prying off one side of the cover with a plastic opening device and peeling it back.

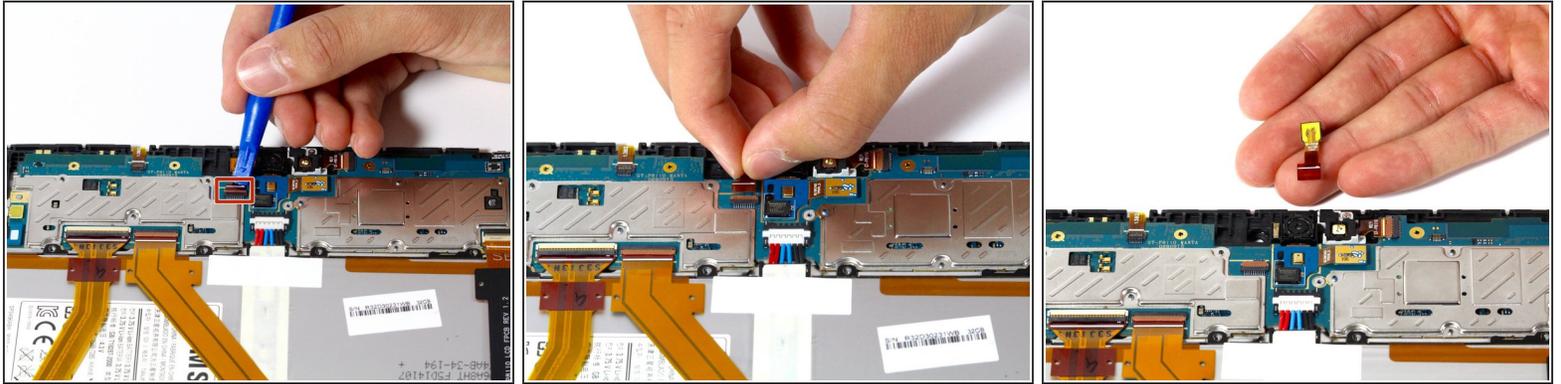

Step 2

- Pry the device apart by inserting a plastic opening tool in the seam between the plastic backing and display assembly. Use the tool to unclip the plastic tabs in between the backing and the display.
- Pull the the plastic backing off the display assembly using your hands.

⚠ Do not do this step with only your hands. You will require a significant amount of force to separate the device.

Step 3

- Lift latch on front-facing camera connector.
- Pull the connector toward the top of the device and remove the front-facing camera.

To reassemble your device, follow these instructions in reverse order.
