INTRODUCTION

The Volkswagen Jetta is a great car for everyday use and is known for its safety and reliability. Many people purchase this car and want it to be theirs so they change up the car little by little. One modification you can do is to get our iJDMTOY Volkswagen Jetta LED Daytime Running Lights. Here is an installation guide on how to do it.

PARTS:

- [iJDMTOY Volkswagen Jetta LED Daytime Running Lights](#) (1)
-

Step 1 — LED Daytime Running Lights

- First find the Daytime Running Lights using this diagram.
- Make sure you pull out the right bulb.

Step 2

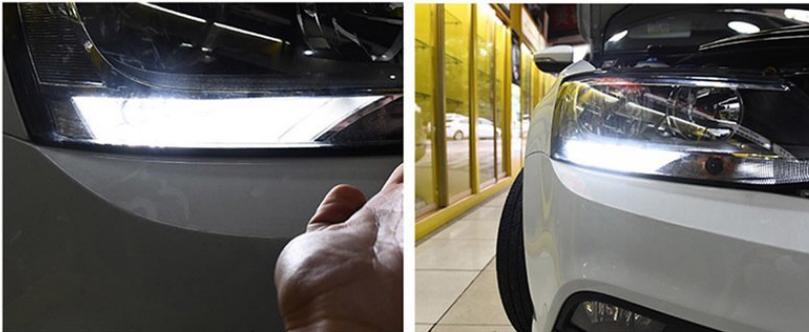

- Take out the adapter that holds the stock incandescent light bulb in place.

Step 3

- Remove the oem light bulb by twisting the bulb and then replace it with your new iJDMTOY LED Daytime Running Lights.

Step 4

- Put everything back together and enjoy your new LED daytime running lights.

As you can see installation was a breeze and very straight forward. In no time, you can have your new iJDMTOY LED Daytime Running Lights installed in no time. You'll add a very luxurious look to the front of the car that many people will love.
