Step 1 — Volume, Camera, & Power Buttons

- Using your hands, carefully remove the back panel by popping the open slit, near the headphone jack, outwards.

Step 2

- Using your fingernail or nylon spudger, remove the battery by lifting upward in the recess of the bottom right corner.
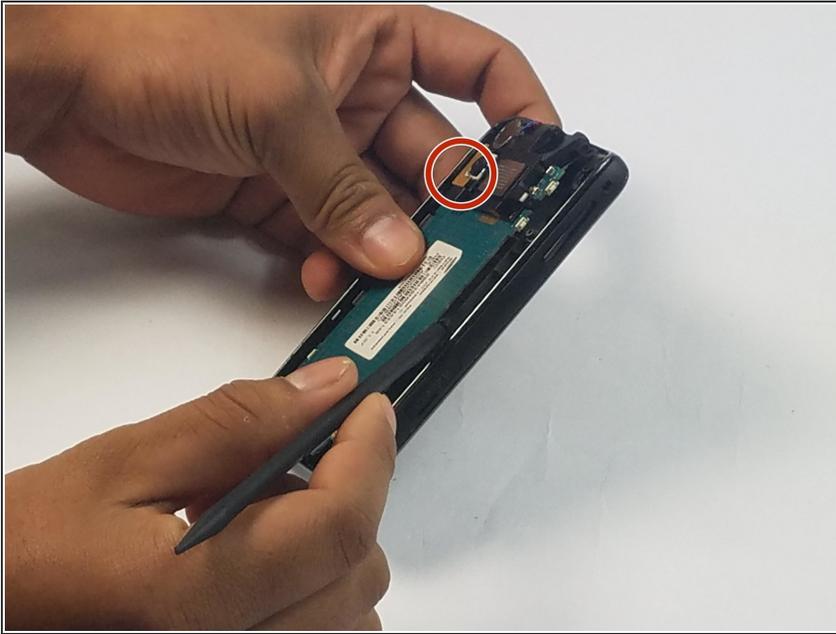

Step 3

- Remove the (6) 4mm screws using a Phillips #00 screwdriver.

Step 4

- Using the black spudger, carefully unhinge and pry the secondary rear panel using the recessed tabs on the left and right sides.

- (i) The secondary rear panel houses the camera lens and speaker assembly,

- ⚠ The metal trim of the headphone jack may come loose during this process.
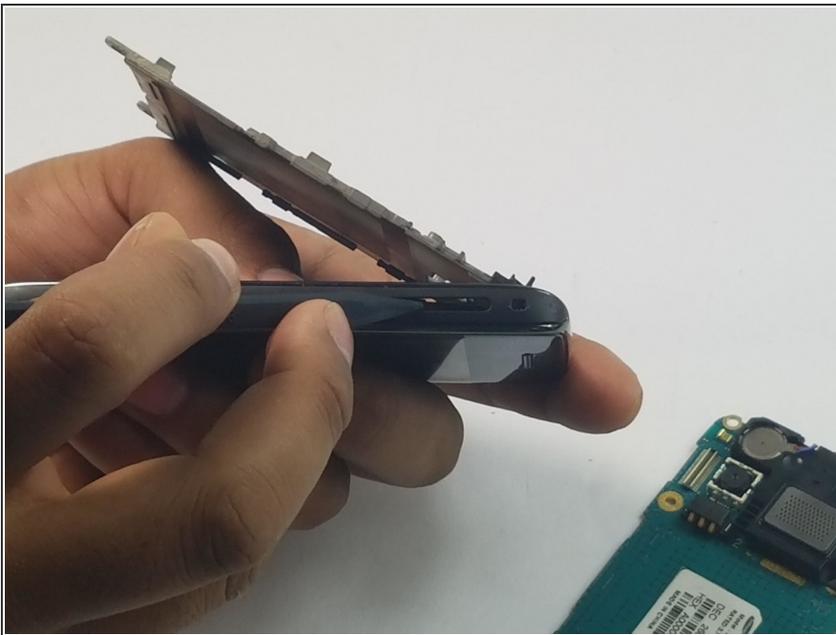

Step 5

- Using the spudger, gently pry upward on the motherboard by the right side.

⚠️ Motherboard is connected to shield plate with ribbon cable.

Step 6

- Remove the desired button by pushing inward with the spudger or disconnecting the rubber pin connections.

To reassemble your device, follow these instructions in reverse order.
