Step 3

- Remove the foam ring around the lens with tweezers.

⚠ Be aware, the electronic components of the LED board may be compromised if you use your fingers instead of tweezers for this step.

Step 4

- Remove the two 5mm Phillips #1 screws.

- Remove the two 8mm Phillips #0 screws.

📌 When reassembling, tighten the top and bottom 5mm screws first, followed by the left and right 8mm screws.

Step 5

- Remove the LED board with tweezers.

- ⓘ It is unnecessary to unplug the LED board from internal components for lens replacement.

Step 6

- Use the Phillips #000 to remove the three 3mm screws on the face of the camera lens

Step 7

- Remove the camera lens.

- ⓘ After replacing camera lens and before reassembly it is encouraged to clean new lens surface with a microfiber lens cleaning cloth

---

To reassemble your device, follow these instructions in reverse order.
