Step 1 — Battery

● Turn over the laptop to view the underside.

Step 2

● Use tweezers (or a similar tool) to slide the orange push pin. To release the battery, push it to the left.

Step 3

- You can lift the battery up and out now.
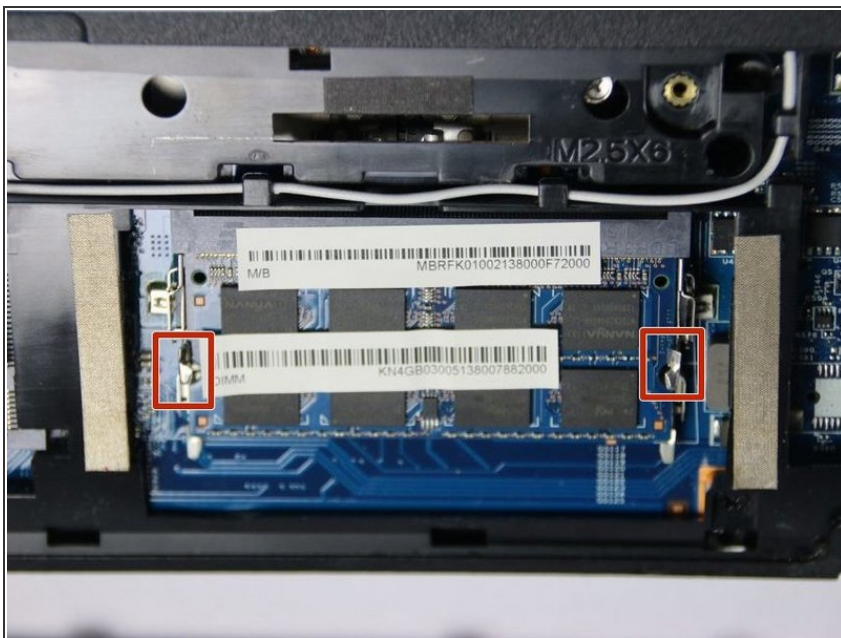

Step 4 — RAM Card

- Remove three 7.0 mm screws with a Phillips head screwdriver from the back panel to gain access to the RAM cards.
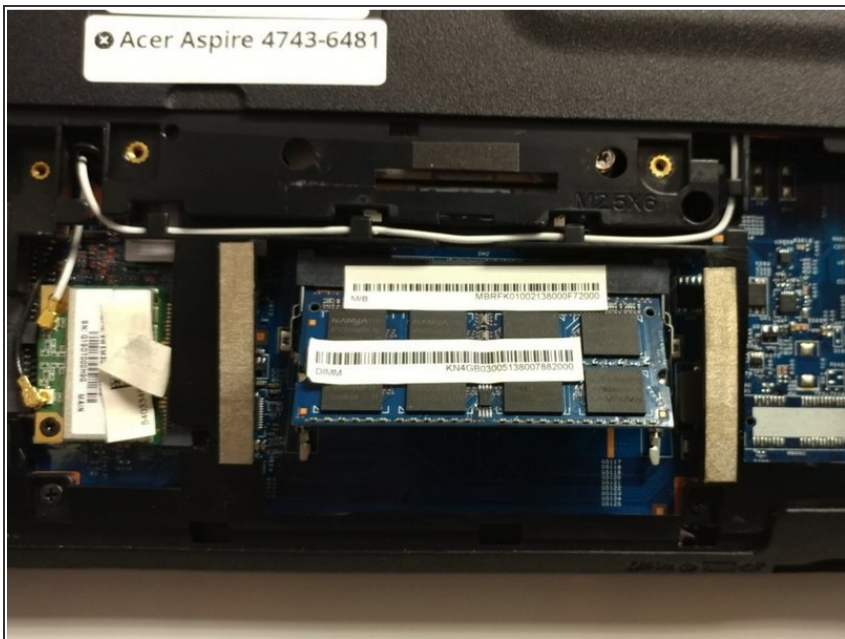

Step 5

- Place the device with the battery side facing up, as shown on the picture.

- After removing the back panel, you will see the RAM cards located to the right.

Step 6

- You should notice a silver tab on each side of the RAM card. Push each tab away at the same time to detach the card.

Step 7

- If done successfully, the RAM should pop out and you can lift it out with no effort.

To reassemble your device, follow these instructions in reverse order.
